URMET GROUP

COMMUNICATION, SECURITY ENERGY AND AUTOMATION. ALL OVER THE WORLD, IN EVERY PROJECT

Urmec Group means integration of expertise and international dimensions, to offer global solutions to its partners. Born in Italy, the Group was able to develop internationally and now it has a significant presence on the world market. Urmec Group designs, develops and markets products and systems in the communication and security sectors, as well as in energy management and saving, telecommunications and building automation. In Italy it is a leader brand for video door phone systems,

telephone systems, automation applications and access control systems, professional intrusion alarm systems, fire alarm and video surveillance systems and for home & building automation; from private homes to town redevelopment planning, up to large public infrastructures Urmec Group offers a complete range of products and services, aiming at being a global partner for its full and thorough know-how, industrial skills, product quality and service efficiency.

SYSTEMS FOR INTEGRATED COMMUNICATION AND SECURITY

Systems and products for video door phone, intrusion alarm, access control, fire alarm, video surveillance, wiring systems.

SYSTEMS FOR ENERGY MANAGEMENT AND SAVING

Heat metering and management systems, renewable energy.

TELECOMMUNICATION SYSTEMS AND SOLUTIONS

Terminals, Telemetry Systems, Road Lighting, Public Telephone Network Systems, Heat Exchangers, Transport, Remote Management Systems.

SYSTEMS AND PRODUCTS FOR BUILDING AUTOMATION

Advanced building automation systems, multi-purpose systems, electronic modules for the automation of electric systems and implementation of multi-controls and centralisations.

URMET IN EVERYBODY'S LIFE. EVERY DAY

Urmet is an Italian company established in 1937. It designs, develops and sells building automation products and systems. A Communication, Security and Building Automation specialist, the company stands out for its flair for innovation and for the development of kits that speed up installation and simplify function management, for residential, office and industrial buildings. The broad range of products provides an exhaustive choice of technological and aesthetic solutions.

Home Automation, Door Phone and Video Door Phone Systems, Telephony, Room Control, Professional Intrusion Alarm, Video Surveillance and Fire Alarm Systems: solutions for every industry, developed in line with market demands. Urmet has an extensive and reliable service network. Italian Customers enjoy the benefits of Urmet's Sales and Service network, which has a widespread presence on the territory, with an extensive network of sales agents and Service centres.

COMMUNICATING

Technological solutions for Home Automation, Door Phone, Video Door Phone and Telephony systems.

PROTECTING

Intrusion Alarm, Fire Alarm and Video Surveillance systems and devices.

MANAGING

Simple building automation solutions based on a comprehensive range of digital modules consisting of transmitters, receivers and remote controls.

KITS

Ready solutions to meet Communication and Security needs.

SHOWCASE

The 2Voice developments

2Voice renews itself and now it is even more convenient.

The new Miro monitor, in video and audio-only version, increases the design style range and makes the choice of 2Voice more convenient to create audio systems, also thanks to a new door phone system basic kit.

IP range: IPerVoice and IP kit

IperVoice is the universal integrated communication and security system for buildings offering video surveillance, intrusion alarm, access control and lift control device, exchange with or without VoIP terminal, interfacing with IperView.

With **IperVoice** a single cable is enough to manage the whole system.

The simple, uncomplicated wiring allows to meet any installation requirements.

The new IP vandal resistant villa Kit (with Max and Sinthesi Steel), the only kit suitable to be integrated with safety and building automation systems through Urmet Apps already installed on the screen.

Call forwarding

CallMe and **Call2U** allow to connect the video door phone to your smartphone to answer and open doors and gates even when you're not at home.

CallMe: just install the connection device in the video door phone system and download the free **App Urmet CallMe**.

CallMe is compatible with all Urmet video and audio door phone systems, either analogue or in the **2Voice** range.

Call2U does not require any device, it's enough to download and configure the free app.

The system preferred by the installers

IP RANGE

IperVoice and IP vandal resistant villa Kit

CALL FORWARDING

Video door phone and smartphone, always connected

Miro & Yokis

Miro is the leading monitor in terms of design, technology and convenience.

Miro allows to make the most of the **2Voice** system power, function and versatility to its full potential.

Audio and video, hands-free and with micro receiver.

The **Miro** family boasts a comprehensive range of models for all needs, either analogue or digital.

It allows to access all video door phone system functions and, thanks to its integration with the **Yokis** simple building automation solution, turns the monitor into the control device for all scenarios.

MIRO

More design, more technology and more savings

Prodel artistic entry panels

The artistic entry panels manufactured by Prodel S.r.l., an Urmet Group company specialised in this type of products, are ideal for antique buildings, valuable houses, single and two-family homes where it is necessary to achieve a high-class design style, keeping all the functions of Urmet video door phone systems

Allinox is the new family of monoblock with fast connection buttons on 2,5 mm thickness. Manufactured in **matt** finishing stainless steel, **Allinox** panels can be customized in shape and size.

Allinox digital is one of the thinnest panel in the world with 1,5 mm thickness only out of the wall, manufactured in **matt** finishing stainless steel.

EXIGO/TITANIUM/ALLINOX

The combination of style and technology

Building automation: Yokis

Yokis is a full range of digital modules, consisting of transmitters, receivers and remote control devices, suitable for simple home automation systems featuring multiple controls for the centralised management of shutters, lights and automation solutions without either relays or control units.

Yokis modules can use the existing wiring and do not require any field bus.

Wired and wireless modules can be used in combined mode.

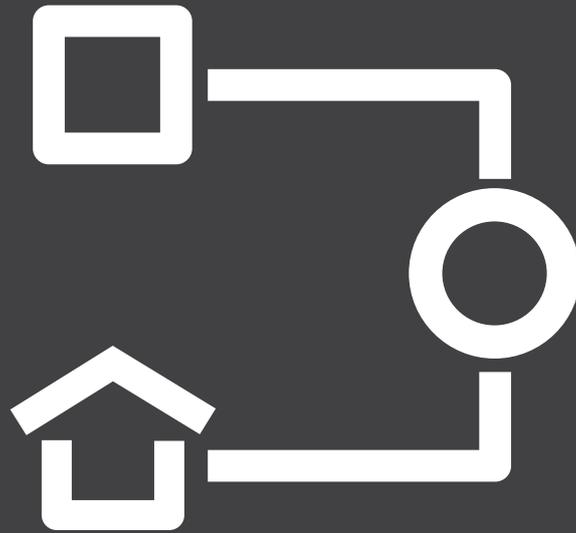

Configuration is simple and can be made through the controls of the wiring system.

SYSTEM GUIDE

2VOICE

ADVANTAGES AND APPLICATIONS

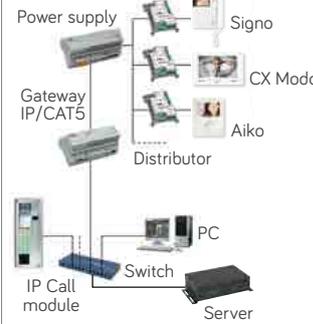

Two non-polarised wires throughout for quick and easy installation. Ideal for villas and large residential complexes alike: **16** main entrances, **32** risers, **127** users per riser column for a total of **4064** users. Free intercom function with four monitors in parallel, integral video surveillance, second entrance management.

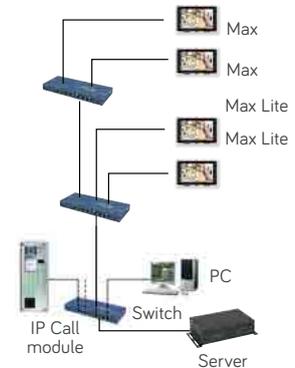

IPERVOICE

ADVANTAGES AND APPLICATIONS

Maximum extension: no limit to the number of users, riser columns, switchboards and conversations. Optical-fibre-ready. Ideal for large residential compounds with high integration needs (access control, switchboards, intrusion alarm systems, video surveillance systems, intercom systems). Self-diagnostic system for checking system state.

2 WIRES
EVERYWHERE
ADVANTAGES
ANY WAY YOU
LOOK AT IT

2 wires anywhere. **127** users per riser. **2** outdoor stations per riser. **32** risers. **4,064** users. **16** main common entries. Up to **1,000**-meter distance between outdoor and indoor station. **200**-meter distance between power unit and indoor station. **2,400**-meter extension in the common section. **800**-meter extension at each riser. **4** parallel connected indoor stations (monitors and/or doorphones). Security cameras per outdoor station. **2** entries managed from a single outdoor station. No need to replace cables in renovations.

2VOICE: A NUMBER 1 HIT WITH JUST 2 WIRES

THE NON-POLARIZED
TWO-WIRE VIDEO-DOORPHONE
SYSTEM WITH THE HIGHEST
PERFORMANCE IN
THE CATEGORY.

Few components, plenty of functions

WHAT DO YOU NEED?

2 NON-POLARIZED WIRES AND
AS LITTLE AS 3 DEVICES:

- > Expandable installation base kit
- > Distributor
- > Indoor station

WHAT DO YOU GET?

- > Mixed audio/video system with analogue colour camera
- > Integrated cctv
- > Free intercom
- > Additional services (such as staircase light control) with no additional wiring
- > Additional resident controlled outputs to control auxiliary devices

Easy to install and programme

2 WIRES EVERYWHERE, NOTHING MORE

Both for standard video-doorphone and additional functions: intercom, exchange or staircase light control.

SIMPLIFIED PROGRAMMING

Associated user names and codes from the key panel is quick and easy: thanks to a simple dedicated software, all you need to do is enter home-owner names and send the information to the directory module via Bluetooth.

FROM VILLAS TO LARGE RESIDENTIAL COMPLEXES

A perfect system for installations of all sizes: from villas, to apartment buildings, through to detached home complexes and large multi-building residential complexes.

PERFECT FOR RENOVATIONS

Uses existing wiring: faster work and possibility of installing innovative, integrated technology solutions also in antique buildings, with no need for masonry work.

ADVANTAGES FOR INSTALLER AND USER

Unparalleled ease of installation, can't-go-wrong concept, fast maintenance (even with installation live); no service interruption in the event of a short-circuit as branch protection keeps riser operating.

2VOICE: LOADS OF FUNCTIONS THAT ARE REALLY USEFUL TO CUSTOMERS

Communication and security in a single system

Intercom

- > Up to four parallel connected monitors per apartment with free intercom.
- > Multiple wiring configurations; series, star or mixed.
- > Wide communication links point to point for the indoor stations whether or not they are within the same apartment.

Concierge

- > Calls from outdoor station can be taken at the concierge lodge and transferred to individual indoor stations.
- > Users can call concierge at any time.
- > Call transfer to cordless phones.

Video surveillance

- > 2Voice can turn the video-doorphone system into a video surveillance system.
- > Two cameras can be connected immediately to the system.
- > Handles up to maximum 5 cameras when a video switcher is added.
- > Image from individual cameras can be viewed directly in the apartment on the doorphone monitor.

Door alarm warning

A light indicator on the video-doorphone indicates when the entry door was not closed properly (function can be disabled).

Second entry control

2Voice outdoor station incorporates a relay that can be used to operate a driveway gate or a second entry, and can be controlled remotely from the indoor stations.

Additional services

The system can be equipped with an additional service with no need to add any devices, such staircase or outside stairs light control, garden irrigation system or any other desired service.

Tone selection

- > All 2Voice indoor stations provide call volume control.
- > The Mute function turns off audio and muted mode is indicated on the device.
- > Broad choice of tones and ring tones that can be associated to different call types (floor call, call from concierge or outdoor station).

Telephony

Possibility to interface with a Pabx or telephones, even wireless, wireless telephones in the appartement.

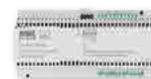

2VOICE REFERENCES

BASIC ELEMENTS

1083/17	16-BUTTON EXPANSION MODULE FOR DIGITAL SYSTEMS To be used with 2Voice outdoor station for expanding the number of call button.
1083/20A	SYSTEM POWER SUPPLY UNIT Used for 2Voice system. Assembly on DIN bar (10 modules). 230Vac 50-60Hz. Output 48Vdc.
1083/40 1083/40C	CONCIERGE SWITCHBOARD Provided with alphanumeric keypad, display and receiver. Provides typical concierge functions. Day/night mode operation. Allows to combine a colour video module 1732/41 with corresponding bracket 1732/91. Ref. 1083/40 (4 digit) - Ref. 1083/40C (6 digit)
1083/50	COLUMN INTERFACE Device used for uncouple riser columns in complex 2Voice systems. Ready for assembly on DIN bar (10 modules).
1083/55	4-USER DISTRIBUTOR Floor distributor. Connection for input bus, output bus and 4 apartment extensions. Equipped with output short-circuit protection. > Dimensions (mm) 45 x 45 x 16 (W x H x D)
1083/67	2VOICE-PSTN INTERFACE AND VIDEO This device allows to connect an analogical telephone or a telephone interface or a PABX to a 2Voice system, to be able of using interphone services also through a telephone terminal. The video is supplied on a coax-type output for connection of compatible terminals. This interface can be programmed in two modes: "internal place" or "call forwarding" as an aid to the 1083/40 gatekeeper lodge exchange. > Power supply: 110/230Vac with power supply provided with kit > Size: 10 DIN modules > Size of Power Supply: 1.5 DIN modules
1083/75	ENTRY PANEL INTERFACE Device used to connect several main entry panels in 2Voice systems. Ready for assembly on DIN bar (10 modules).
1083/76	EXPANSION FOR MAIN ENTRY PANEL To be used to increase the maximum number of main calling stations in the system up to 16. The device has 4 input lines for connection to main door interfaces Ref. 1083/75 (1 for every 4 calling stations) and 4 output lines for connections to column interfaces Ref. 1083/50. The hub module always requires 1 system power supply Ref. 1083/20A.
1083/90	2VOICE WIRE. 100 METER REEL 2Voice system wire 2 x 1 mm 2. External diameter 6.5 mm. 100 metre reel.
1083/92	2VOICE WIRE. 200 METER REEL 2Voice system wire 2 x 1 mm 2. External diameter 6.5 mm. 200 metre reel.
1083/69	VIDEO SWITCH 4 IN - 1 OUT Switch suitable for use in various applications. Considerably simplifies wiring in systems with several main switching video loudspeaking units and is provided with a specific control input for operating up to 4 cameras in cycle. Each input may also be operated by an alarm control. > Dimensions (mm) 120 x 120 x 55 (W x H x D) 6 DIN modules > Consumption: 10 mA

BASIC ELEMENTS

1783/69		CCTV INTERFACE, 4 CAMERAS, BUS CONNECTION This device enables connecting 4 control cameras on the Data Bus of the 2Voice system. The cameras are connected to the interface and use the Extended Video Signal Balun instead of coaxial cable. This devices can be associated to a plurality of user of the system or to just one of them.
1083/80		2VOICE SPECIAL DECODER Allows users to activate loads by pressing a button or following an event. Ready for assembly on DIN bar (6 modules).
1083/85		YOKIS INTERFACE FOR 2VOICE MODO MONITOR It allows 8 Yokis radio transmitters for lights and windows shutter on Modo monitor. The radio transmitters can control a single digital module or realize multiple scenarios. The 8 controls will be identified just as many icons on the monitor with the possibility to name each one.

ENTRY PANELS

1083/9		OUTDOOR AUDIO STATION - SINTHESI S2 2Voice outdoor audio station with Sinthesi S2 design style (2 modules). Features 2 call keys, loudspeaker and microphone. Two outputs for door release and second car entry with relay. Recessed mount box, frame and trim not included.
1083/64		2VOICE AUDIO MODULE WITH 2 BUTTONS - SINTHESI STEEL On a single Sinthesi Steel module, it is provided with microphone, loudspeaker and 2 call buttons. Two outputs for door release and second car entry with relay. Two inputs for local door release button and door open signalization. Dip switch to set the module address, the door open mode (free or after a call only). It's possible to set the time for the door opening. Connector for ILA module and for DDA module.
1083/74		2VOICE AUDIO MODULE WITH 2 BUTTONS - SINTHESI S2 On a single Sinthesi S2 module, it is provided with microphone, loudspeaker and 2 call buttons. Two outputs for door release and second car entry with relay. Two inputs for local door release button and door open signalization. Dip switch to set the module address, the door open mode (free or after a call only). It's possible to set the time for the door opening. Connector for ILA module and for DDA module.
1083/8		OUTDOOR AUDIO STATION FOR EXIGO DESIGN LINE For use in combination with 1083/17 module (one every 16 users).
1810/40		COLOUR CAMERA FOR 2VOICE SYSTEM To be used with ref. 1083/8 for Exigo, Exigo Digital and Titanium panels.
1083/19 1083/19C		SINTHESI S2 DIGITAL CALL MODULE WITH CONTROL PANEL FOR 2VOICE Size equivalent to 2 Sinthesi S2 modules. Features alphanumeric control panel, arrow keys to select names from electronic director, 2 line 16-character display. Bluetooth interface for programming from mobile phone/smartphone/PDA. Can be combined with camera to set up video call stations Ref. 1083/19 (4 digit) - Ref. 1083/19C (6 digit).
1083/14		SINTHESI STEEL DIGITAL CALL MODULE WITH CONTROL PANEL FOR 2VOICE Size equivalent to 2 Sinthesi Steel modules. Features alphanumeric control panel, arrow keys to select names from electronic director, 2 line 16-character display. Bluetooth interface for programming from mobile phone/smartphone/PDA. Can be combined with camera to set up video call stations.

iPer voice

IP TECHNOLOGY INTEGRATED SOLUTIONS FOR SMART BUILDINGS

1 type of cable for the whole system. Unlimited extension, risers, users and functions. Integrated functions connected to video-doorphone service. All devices and functions are installed directly in the system, with no need for additional wiring.

IPERVOICE: TOTAL INTEGRATION, NOTHING IS IMPOSSIBLE

First digital system entirely over
CAT5/5e/6 cable or fiber optics

1 wire for
the whole system

IperVoice is ideal for large complexes and offers unlimited:

- > Extension and distance
- > Risers
- > Number of exchanges
- > Number of users
- > Number of calls at the same time
(inside and outside apartment)

WHAT DO YOU NEED?

In larger residential complexes, offering users a higher degree of automation and improved building control is a key competitive edge. IperVoice makes the difference thanks to advanced functions that integrate into the video-doorphone service, with two key advantages: simple controls and a limited number of management devices in common areas and apartments.

FUNCTIONS

A broad range of functions can be installed directly in the system with no need for additional wiring. All controls are available at the indoor video-doorphone monitor, turning the concierge evolves into a control centre that gathers all building information in terms of:

- > Video surveillance
- > Concierge
- > Intrusion detection
- > Access control
- > Lift control

WHAT DO YOU GET?

With IperVoice, installers can provide their customers with a high-tech product that reduces installation time and cost thanks to IP technology, the convenience of using a same cable for all connections, and PoE switches used for distribution. Simple and uncomplicated, Ethernet cabling meets any installation requirements, providing communication throughout the residential complex and facilitating function integration.

IPERVOICE: INTEGRATED SOLUTIONS FOR IMPROVED BUILDING AUTOMATION AND SECURITY

Intercom

- > Up to 16 devices per apartment can communicate with one another at all time without occupying the riser line
- > Allows communication with all other users in the complex and with the different manned stations in common areas
- > Unlimited intercom calls with other users: thanks to the touch-screen monitors, each apartment can call any other terminal

Lift control

- > Send lift to desired floor

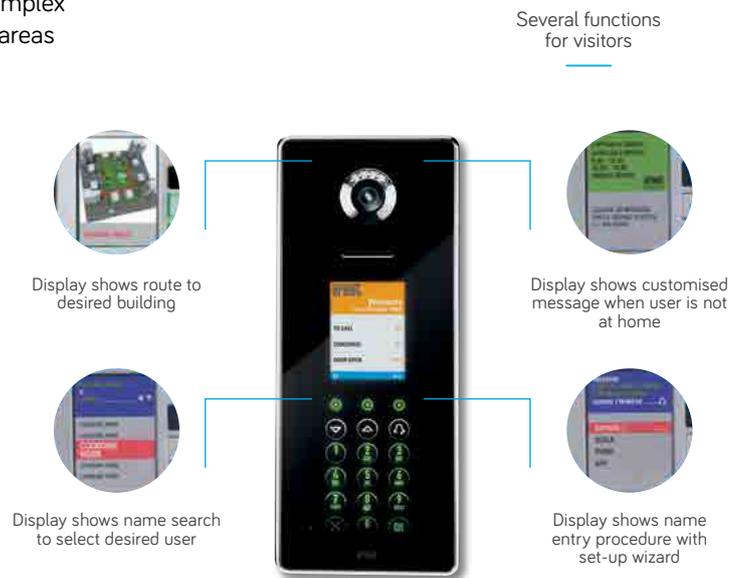

VoIP

- > A phone with the potential of a switchboard
- > Installs in common areas, allows two-way communication with all users
- > Door opener function

Access control

- > Entry/exit detection and recording
- > Each passage is associated to a specific key or access code
- > Anti pass-back function inhibits multiple access with same key

VOIP telephone integration

IPERVOICE: INTEGRATED SOLUTIONS FOR IMPROVED BUILDING AUTOMATION AND SECURITY

Intrusion detection systems

- > Urmet alarm systems installed in an apartment can be integrated in the video-doorphone service
- > Any alarm signal generated in the apartment is automatically transferred to gatekeeper lodge
- > Siren activation or light indicator in landing

Video-doorphone function

- > IPerVoice adds new solutions to conventional video-doorphone functions
- > With the dedicated push-button panel Elekta, each user can associate his/her name to a logo, or an image and show the route to his/her home on a graphic map for visitors
- > Written messages can be entered to be displayed when a visitor rings the bell and no one is at home
- > Visitors can record audio messages that the user can listen from the home monitor

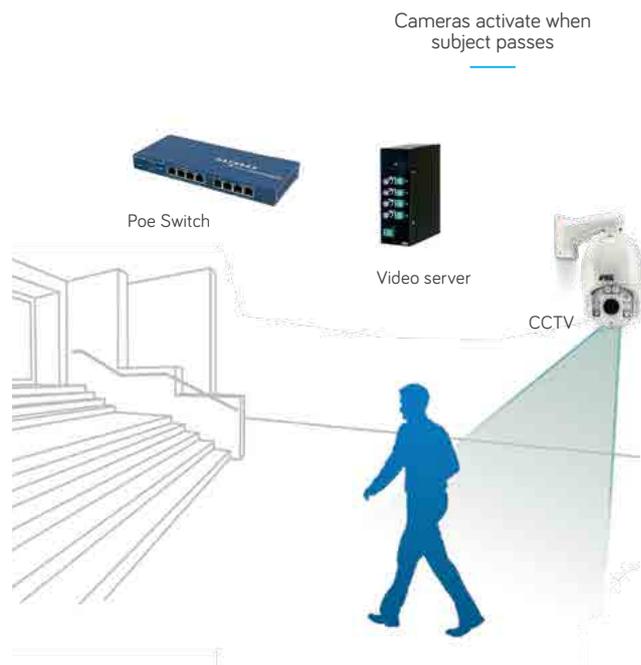

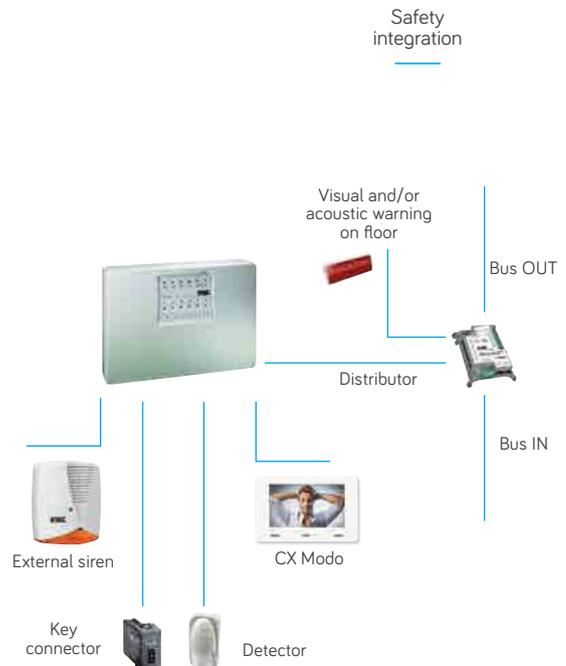

Video surveillance

- > Unlimited number of cameras
- > CCTV stream can be viewed from concierge lodge and individual apartments
- > Each camera can be connected to an alarm sensor
- > Alarm event triggers call to concierge and video recording

Concierge

- > Concierge evolves into a control centre
- > Management of all communication streams
- > Supports several exchanges for different groups of users
- > Integration with any type of terminals: cordless phones, earphones, PC

1039/50

BASIC ELEMENTS

1039/1	IP SYSTEM SERVER With RJ45 port and two USB ports. Ready for mounted on wall and on DIN bar. With 2.5" HDD. On/off button and LED, reset button. Power supply unit included. > Dimensions (mm) 172 x 55 x 114 (W x H x D)
1039/100	SET OF 20 RJ45 CONNECTORS IP SIDE Set of 20 RJ45 connectors with "URMET" print for connecting compatible IP devices.
1039/101	SET OF 20 RJ45 CONNECTORS COLUMN SIDE Set of 20 RJ45 connectors with "NO LAN" print for connecting IP IperVoice column devices.
1039/20	UTP CAT5/5E/6 COLUMN POWER SUPPLY UNIT Power supply unit for IperVoice riser. Provided with two RJ45 connectors for inlet and output bus. With LED and trimmer for video signal equalisation. > Dimensions DIN bar (10 modules)
1039/34	UTP CAT5/5E/6 FOUR-USER DISTRIBUTOR Four user in column. With four RJ45 connectors for connecting users and two RJ45 connectors for input and output buses. Call floor for each user. Terminals for connecting the second audio channel to the column. Relay output for connecting to a floor alarm signal.
1039/36	UTP CAT5/5E/6 INTERCOM DEVICE For connecting four apartment devices (audio or video doorphones) allowing intercom functions. Up to four devices in a cascade for a total of 16 devices in parallel and intercommunicating in the same apartment. > Dimensions DIN bar (6 modules). Local power supply with 1039/20.
1039/37	UTP CAT5/5E/6 LIFT INTERFACE Allows to supply door open information to the lift control unit of the building. Provided with 24 NO/C/NC relay outputs which can be associated to each user or group of users. Up to eight devices can be connected in cascade for a total of 192 commands. DIN bar (12 modules). Locally powered by 1039/20.
1039/41	PC CONCIERGE SWITCHBOARD Atlantico doorphone with USB connector and A/V plug for connection to PC. Provides audio doorphone connection to concierge switchboard application.
1039/44	4 PORTS + 4POE SWITCH Switch with 8 ports, of which four PoE. 110-230 Vac/50-60 Hz power supply unit.
1039/50	IP/UTP CAT5/5E/6 GATEWAY For interfacing IP backbone with riser column. DIN bar (10 modules).
1039/56	BLUETOOTH PROGRAMMING DEVICE Interface for programming column devices using mobile phone or PDA. Provided with adapter cable.
1039/61	APARTMENT ALARM INTERFACE Interface board to be arranged inside URMET units 1061/004 and 1061/006.
1039/69	IPERVOICE VIDEO SERVER For connecting 4 traditional cameras. The images are conveyed to IP bus and displayed on devices in the system (monitor, switchboards).

ANALOGUE VIDEO SYSTEM:
COAX SYSTEM
5 WIRE SYSTEM

ANALOGUE AUDIO SYSTEM:
4+N SYSTEM
1+N SYSTEM

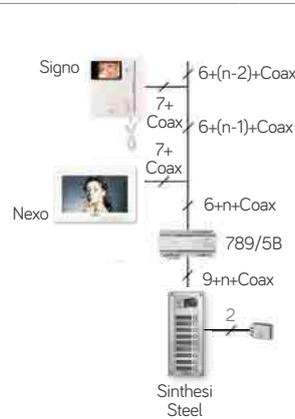

SYSTEM GUIDE

ANALOGUE VIDEO SYSTEM:

COAX

ADVANTAGES AND APPLICATIONS

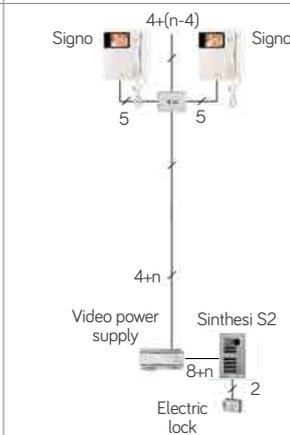

Large distances between camera and monitors. 4+n doorphone with electronic call are used. Very high number of configurations with b/w and colour video doorphones.

5 WIRE

ADVANTAGES AND APPLICATIONS

Derived from the 1+n audio system for transforming 4+n audio system into video systems without adding a coaxial cable.

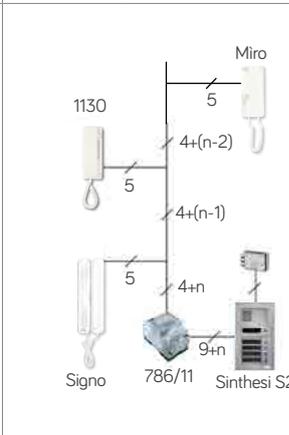

ANALOGUE AUDIO SYSTEM

4+N

ADVANTAGES AND APPLICATIONS

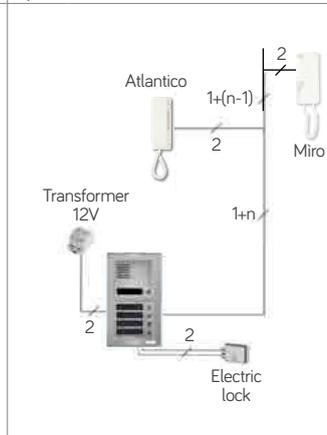

Traditional and electronic call doorphone are used. Systems with intercom service and conversation privacy function to door unit and systems with several automatically switching entrances can be made.

1+N

ADVANTAGES AND APPLICATIONS

Ideal for transforming a typical door bell system into complete doorphone system without needing to add wires to the riser column. Conversation privacy guaranteed between apartments.

COMPARISON TABLE

> No. of users	20

> Medium systems	YES
> Large systems	NO

ANALOGUE VIDEO SYSTEM COAX / 5 WIRE

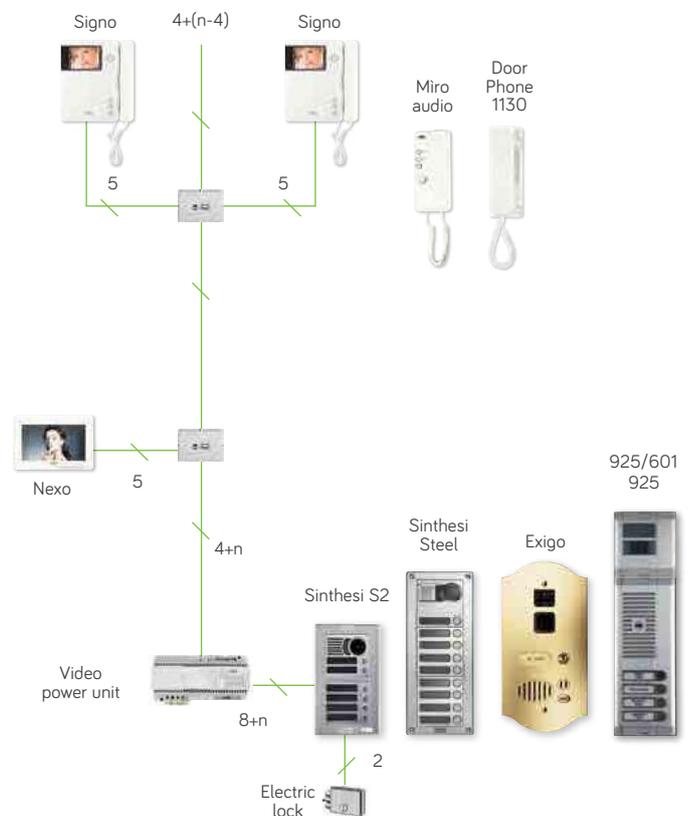

COAX SYSTEM

In systems with coaxial cable, 4+n door phones with electronic call are used, and it is possible to arrange many configuration combinations, both with b/w and colour video door phones. The coaxial cable allows to cover long distances between camera unit and monitors and allows to arrange the same type of systems used with 4+n audio system.

5 WIRE SYSTEM

The 5-wire system, deriving from the 1+n audio system, is suitable to transform 4+n audio systems into video systems without adding the coaxial cable and other wires inside the riser.

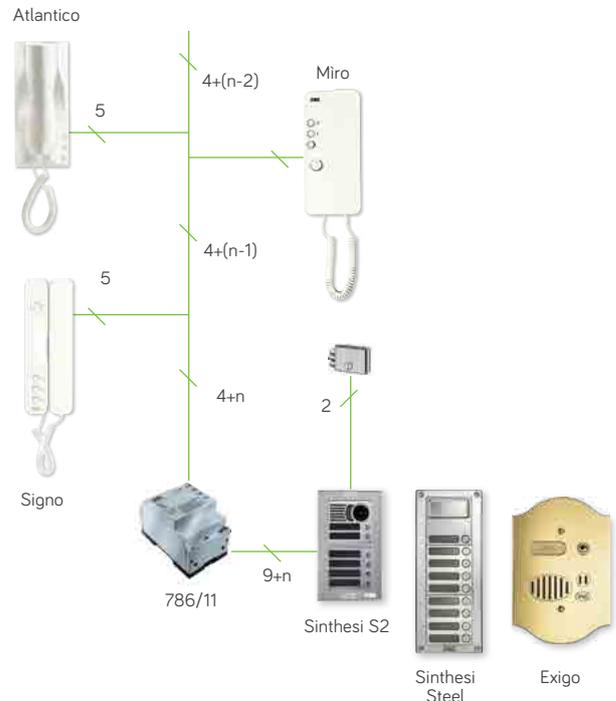

ANALOGUE AUDIO SYSTEM

4+N / 1+N

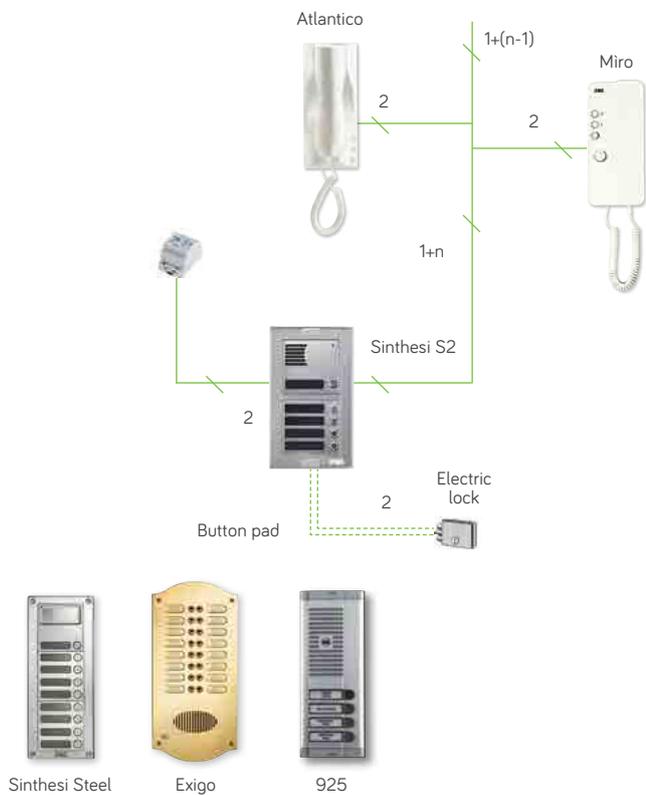

4+N SYSTEM

With 4+n systems it is possible to create a system using 4 common wires plus "n" wires inside the riser, where "n" is the number of calls to manage. Furthermore, the 4+n system allows to use door phones with traditional call (on 12 Vac buzzer) or with electronic call (the loudspeaker of the same door phone is used to emit the calling sound) and to build systems in which the intercom service with conversation secrecy towards the outdoor station or systems with multiple inputs and automatic switching are required.

1+N SYSTEM

Ideal for transforming a typical door bell system into complete doorphone system without needing to add wires to the riser column. Conversation privacy guaranteed between apartments.

RINGERS

MISTRAL WIRELESS RINGERS

Urmet has a complete range of traditional ringers, compatible with all system types. Mistral integrates the range with a series of amplified ringers which can emit a flash of light. All wireless: for installation convenience because no wire connections are needed, particularly appreciated when working on existing systems. Furthermore, the wireless solution means that portable receivers can be used: these are particularly useful for villa or condo superintendents, convalescents and for convenient use. The wireless ringer reception range reaches 150 or 200 metres according to the model.

The ring tone can be chosen. Repeater function: the distance between ringer and calling button can be increased by connecting a calling button on a second wireless ringer. By using a call repeater 4311/13, a call can be repeated to a Mistral ringer installed in any system. Transmission frequency: 868.35Mhz. Alarm function: press the transmitted button for longer than 2s to generate an alarm signal which is different from the chosen sound.

COD. 752

VIVA-VOCE DUO

MAIN FEATURES

- > Duo: two call-switching panels with conversation privacy function and wire in column

VERSATILE SOLUTIONS

Duo hands-free sends the call from entry panel to apartment station speaker, allows two-way communication and operates the door lock in addition to other supplementary services.

DUO APARTMENT STATIONS

UTOPIA DUO HANDS-FREE MOD. 752. MATERIAL: WHITE ABS

Provide with door opening button, audio button, supplementary service button, adjustable call volume with open door mute and LED indicators.

752/33

Full-Duplex operation. May replace Superjolly doorphone Ref. 4340/23 with the addition of a buzzer Ref. 9854/52. Suitable for wall-mounting or flush-mounting using box Ref. 752/60.

- > Wall-mounted installation dimensions (mm) 88 x 155 x 40 (W x H x D)
- > Flush-mounted installation, including frame (mm) 128 x 230 x 13 (W x H x D)

752/33

ACCESSORIES

FLUSH-MOUNTING BOX WITH UTOPIA DUO WALL FRAME

This is used to install the Duo hands-free doorphone Ref. 752 flushed with the wall.

CALL
FORWARDING

| CALL2U
| CALLME

CALL FORWARDING NEW

TO BE AT HOME
WHEREVER YOU ARE

Urmecall forwarding solutions allow to answer video door phone calls and activate scenarios, such as opening your home door or the gate, by simply using your smartphone or tablet. To enable the call forwarding function you do not have to replace your video door phone. Simply download the **free app** for **Android** or **iOS**.

Call2U and **CallMe** are ready to use, at any time and in any place. Simple, quick, safe: go out with the maximum peace of mind and be always connected to home.

+ COMFORT

Are you in your garden, on the terrace or in front of the TV? No need to stand up: with **Urmecall forwarding systems** you don't have to stop what you're doing to answer the door.

+ PRACTICAL

Is there a parcel for you and you are not at home? With **Urmecall forwarding systems** you can speak with the courier and arrange a new delivery or open the door to leave the parcel to a neighbour.

+ OPPORTUNITIES

Have you got a second house? With the **Urmecall forwarding systems** you can check who's ringing and manage your call at any moment.

+ SECURITY

Have you left elderly people alone at home? With **Urmecall forwarding systems** you can check who's ringing and answer in their place. In addition, they can call you on your smartphone without having to look for your mobile number: they simply have to press the key on the door phone and get in touch.

MONITOR ACCESSES AND REMOTELY
MANAGE YOUR VIDEO DOOR PHONE

CALL2U CALL FORWARDING

Urmet **Call2U** is meant for **Urmet IP systems**: IperVoice and the IP 1060/601 kit. Urmet **Call2U** brings the video door phone on Smartphone to answer calls even when not at home or at the office.

deliver a package when the addressee is not home and to ask the courier to leave the package to the neighbour, or to inform a customer who's ringing at your office door that you'll be late.

Downloading the app is extremely easy: just enter your data and you'll be immediately connected to the video door phone. With Urmet **Call2U** it will no longer be a problem to

Urmet forwards any calls directly to your smartphone and allows talking with the caller and opening the home gate, as if you were in front of your apartment's monitor.

Microphone
silencer

Door
opener

Driveway
gate opening

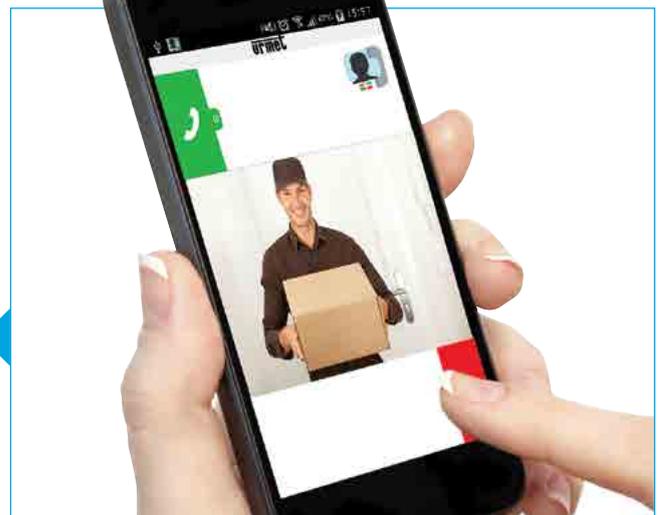

Conversation
end

Using Urmet **Call2U** is easier than you think. When you leave home or your office, you just have to select the remote mode on the monitor to activate the call forward.

The call forwarding function is compatible with all indoor stations of the **IPerVoice line by Urmet**.

All it takes to use it are an internet connection, configure it on the system and install the **Call2U** app on your smartphone.

COMPATIBLE WITH

Android® iPhone® iPad®

CALLME CALL FORWARDING

CALLME IS A VIDEO DOOR PHONE DEVICE ALLOWING TO SEE WHO'S CALLING AND OPEN DIRECTLY FROM A SMARTPHONE OR TABLET

CallMe is the call forwarding system designed by **Urmet** allowing you to use your smartphone or tablet to answer your video door phone and open doors and gates even when you are not at home: just install the special connecting device inside your video door phone system

and download the free **Urmet CallMe App**. With **CallMe** you'll no longer have to stay at home to wait for the courier or hang notices on your wall; now you can answer your video door phone and see who's calling at any moment, as if you were right at home.

EASY TO INSTALL

- > **CallMe** is compatible with **all Urmet video and audio door phone systems** also audio of the 2Voice range, analogue 4+N and coaxial, as well as 1722 kits
- > The device may be mounted on a **DIN panel** or on the wall using the suitable wall mounting kit: it takes little space and does not require any work on the wall
- > It can be installed in the apartments without any intervention inside the riser: each dweller makes his/her decision
- > It does not require any additional power supply up to **12 indoor stations***
- > It also allows forwarding a call to **up to 4 different mobile devices** and allows to make intercom calls
- > **ADSL** connection through Wi-Fi or network cable
- > Several **CallMe** devices can be managed with a single smartphone (seaside house, country house, parents' home, office, etc.)

Compatible with all Urmet 2Voice indoor and analogue (4+n and coax.) stations

Does not require the replacement of the old video door phone

Allows call forwarding up to 4 mobile devices

Allows intercom calls to mobile devices

It features an RJ45 port for wired connection as an alternative to Wi-Fi connection

It does not require any power supply up to 12 indoor stations

CALLME CALL FORWARDING

The additional component may be installed on a DIN or wall panel using the suitable wall-mounting kit. The configuration is very simple: to operate it connect it to the **ADSL** through **Wi-Fi** or a **network cable**. As opposed to other products on the market, Urmet connection devices are fitted with an **RJ45**

port preventing any and all inconveniences due to the lack of signal coverage. Using the specific **App** it is possible to personalise the system according to personal needs, e.g. define the quality of the signal or receive calls only when connected to a Wi-Fi network.

DESIGN AND VERSATILITY

Urmet's range of apartment stations maintains its reputation as the most exhaustive, flexible range on the market, offering a broad variety of door phones and monitors compatible with analogue and digital systems. Technology and design lie at the core of product development concept: this is how the new hands-free units **Max, Miro, CX Modo and Aiko**, were developed

to offer technological solutions that suit every décor style. **Urmet** developed its new products in a way to make them suitable for use also by the hearing impaired. **Modo, Aiko, Signo** can emit electromagnetic waves that can be detected by hearing aids. These devices are compatible with all induction loop antennas for hearing aids (ETS 300381 and EN 60118 standards).

SOLUTIONS
FOR ALL
DÉCOR STYLES:
PRESTIGE,
HOME LUXURY

Max

A 7-inch, latest generation screen revolutionising the world of video door phone systems.

Modo

Integration with Urmet building automation systems, IPerHome and Yokis; management up to 126 intercom calls.

Cx Modo

Video answering machine, video surveillance and call forwarding on a smartphone if you're not home.

Aiko

Design where you don't expect it, with advanced design and an incredibly ergonomic interface.

Nexo

History evolved; fitted with colour wide-screen on analogue systems Design where you least expect it, with captivating lines and an incredibly ergonomic interface.

Range Miro

The Miro monitor family multiplies your communication potential. Available with hands-free unit and micro receiver, each in the video and audio versions, they give access to all video door phone system features and allow easy control of building automation systems with Yokis modules. Communicating has never been this easy.

Signo

A best-seller on the Italian market, its minimal style combines with a strong personality even in the audio-only version.

1130

A classic, now also universal.

DEMAND THE MOST

max

Max is the new latest generation 7" IP touch screen by Urmet revolutionising the world of video door phones; the thin and state-of-the-art display may be wall or flush mounted, without any encumbrance. Its sleek and versatile line makes it **an object with a unique design**, which integrates perfectly in any contemporary interior. The screen leverages the **Sensitive Touch** technology to integrate such innovative functions as building automation control, appliance and video surveillance

system management, proximity key scanning for facilitated access, audio and video call and messaging management directly from a smartphone through the Urmet **Call2U** system. Its simple and user-friendly interface is very easy to operate, even for those who are not particularly familiar with modern technology.

UNIQUE DESIGN, SENSITIVE TOUCHDISPLAY, BUILDING AUTOMATION CONTROL

COMPATIBLE WITH

Max allows to forward a video door phone call on smartphones and tablets through the Call2U app for IP systems (see page 40)

Opportunity to integrate Yokis modules. Yokis, a comprehensive range of digital micro-modules for electric system automation

COMMUNICATION, TODAY

modo

A wide space for images with **Modo**. With a 7" colour display and the option to cyclically select the cameras connected with the **IperVoice** system, this monitor guarantees effective control over all video-monitored areas.

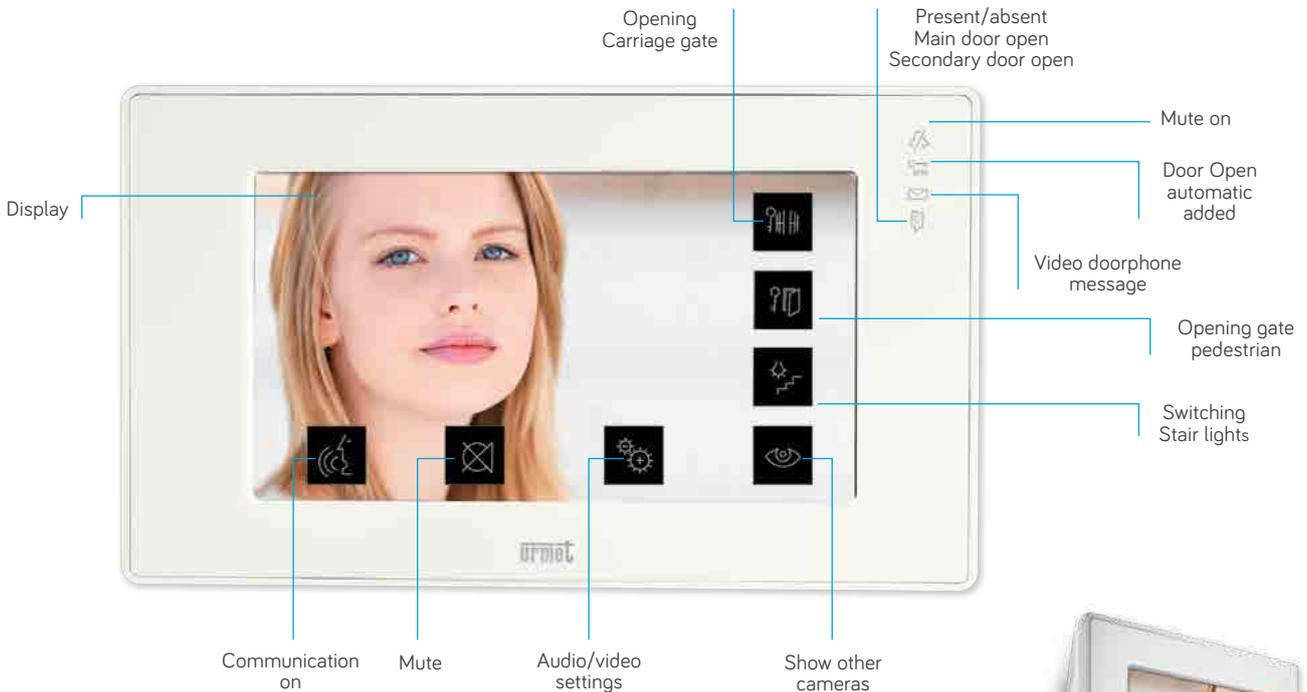

Moreover, the integrated video door phone answering machine allows to view the messages left by those who looked for the user while absent.

Modo confirms to be leader in terms of performance even for the other video door phone functions: intercom calls, including those to the exchange, are unlimited and every name can be sought directly from the virtual keyboard on the screen or by selecting it from the internal contact list, making this system truly user-friendly.

Moreover, communication occurs in a hands-free mode, with the option of interrupting the outbound audio, thus enhancing the privacy of your conversations.

The sound is optimal thanks to **2** very powerful **loudspeakers**. Audio management is free also in terms of call tones, with several options already installed and to choose from; sound can also be muted, thanks to the LED-indicated MUTE function.

The freedom and versatility of this screen goes deeper: indeed it can independently manage two electrical locks. **Modo** brings home the most advanced technology with a minimal look: one simple, smooth-lined frame made of top materials.

MORE THAN A VIDEO DOORPHONE

CX Modo is perfect for customers who love to match their passion for design and latest generation technology.

Today this is possible also in the video door phone segment thanks to a 7" display offering a sharp, high definition resolution with a simple and user-friendly user interface.

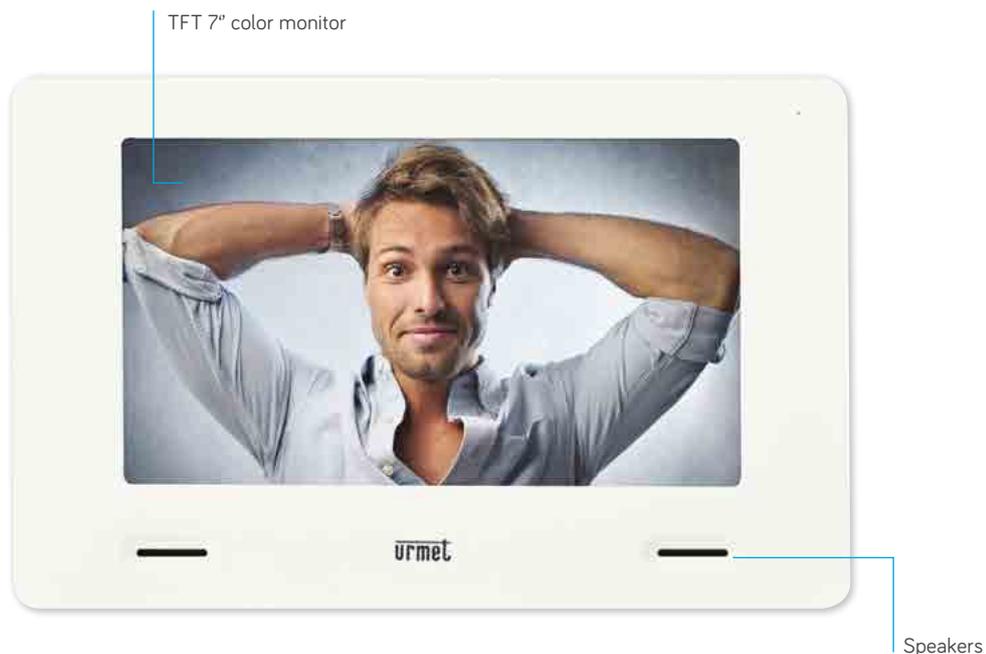

CX Modo is dedicated to the **IPerVoice system**, which is ideal for very large buildings thanks to its IP technology.

Indeed, with a single cable, labour and material costs are drastically reduced, though the evolved system is effective, easily scalable and offers more solutions. The screen allows to integrate such basic home automation functions as light control, shutter control, garden irrigation and scenario design.

CX Modo is the new 7" screen for the Urmet IPerVoice digital system, which integrates all communication systems in a building.

Automatic video-on function to use the external camera in the video surveillance mode, video messaging, door opener and many other additional services, such as automatic elevator call to the entrance floor. It can be wall mounted with very low encumbrance; sophisticated and light design.

DESIGN WHERE YOU LEAST EXPECT IT

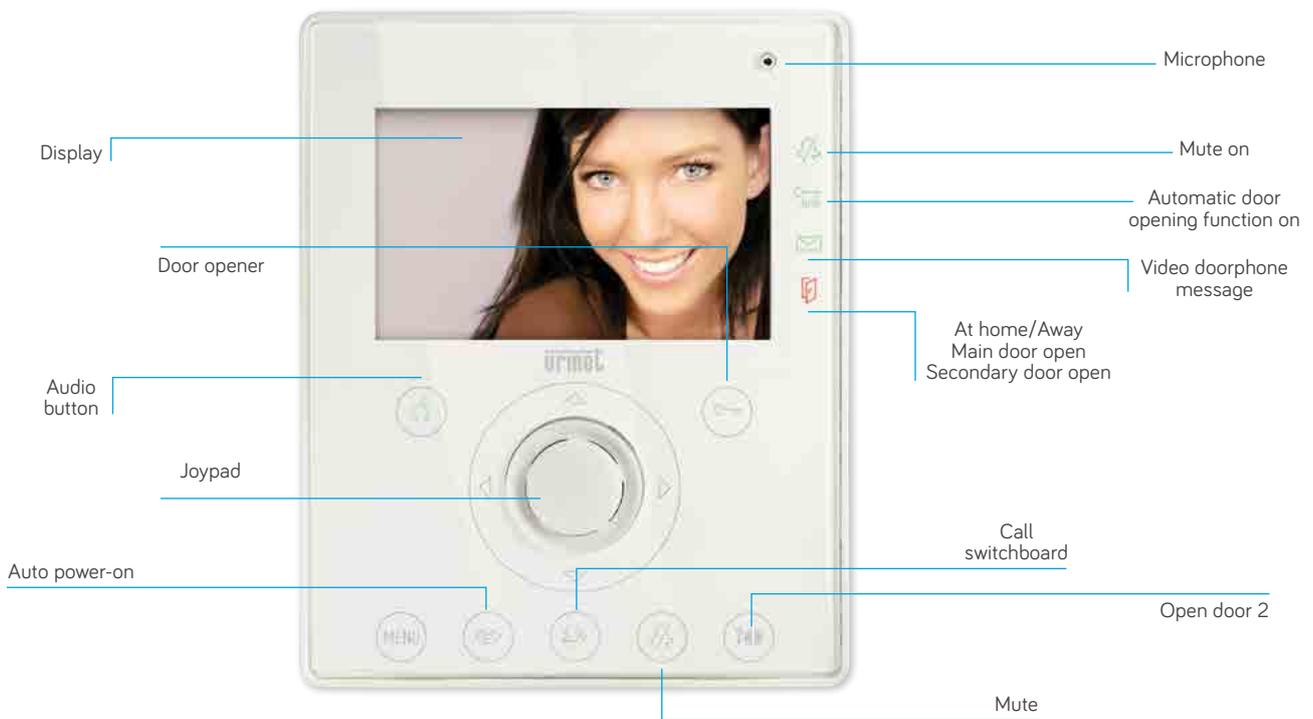

aiko

Precious materials, advanced functions, compact size. The new hands-free video door phone **Aiko**, available in two colour themes - white and black - meets market demands and impresses with its clean and minimal design.

Every control is managed by lightly touching the front: this is the product of the **Soft-Touch** technology, leaving lines unchanged while simply activating the call, the receiver, the door opener and all other additional services,

such as differentiated floor call, entrance door open warning, second electrical gateway opening and staircase lights control.

The **OSD 4.3" colour display** ensures sharp vision from all angles. The menu is user friendly thanks to the intuitive icons guiding the user: it is possible to access it at any time, also during the call, in order to adjust receiver volume and contrast, colour and brightness.

INNOVATION DRIVEN BY PASSION

nexo

INNOVATION DRIVEN BY PASSION.

Nexo represents the apex of technology evolution in the field of video door phone systems with coaxial system.

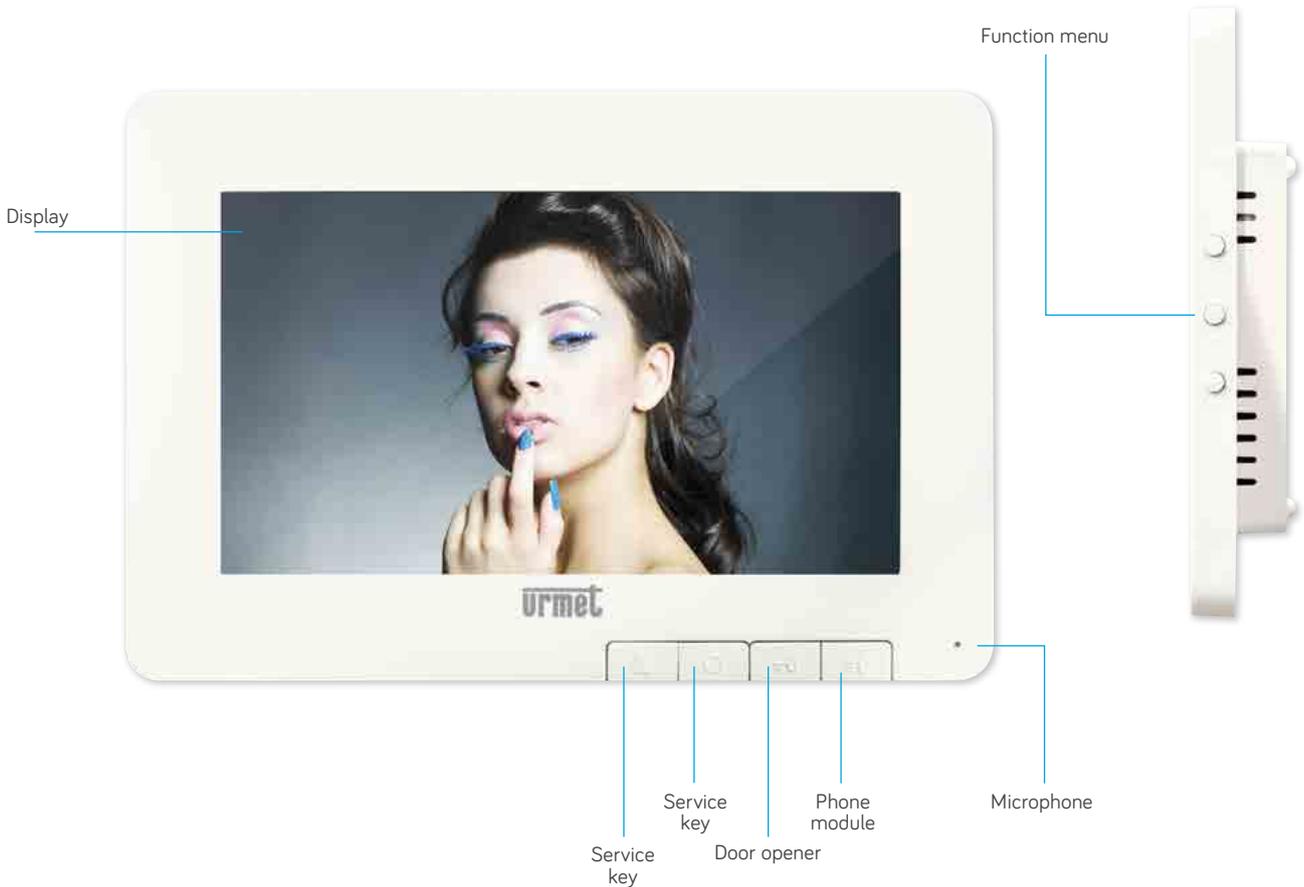

A 7" colour **TFT monitor**, hands-free audio and a simple interface make for a tool that is easy to use and beautiful to look at.

With the new monitor **Nexo**, Urmet is set to revolutionise and give new impetus to the video door phone systems

industry by introducing a high-technology device that improves the performance of existing systems without extensive modifications.

Nexo offers a modern design providing a contemporary home accent, improved security thanks to higher image resolution, and value for money by expanding the capabilities of conventional systems.

All functions (audio ON/OFF, door opening, accessory functions) can be activated from four simple modules.

CONTEMPORARY STYLE

QUALITY IS IN THE DETAILS.

You see, touch and feel it: its polished finish gives shine to the sturdy ABS housing, which conveys uncompromising strength also to touch. The buttons have a short and clear operation, while sound quality is among the highest in the market. Miro is the leading monitor in terms of design, technology and convenience. Miro allows to employ the 2Voice system power, function and versatility to its full potential, also for audio or mixed systems. Besides the three standard buttons for ancillary services and the presetting for people with hearing aids, Miro video version features a wide 4.3" colour display. Available both for the digital 2Voice two non-polarised wires system and for the 4+n and 1+n analogue versions, this new

miro | miro AUDIO

Urmet door phone is all about design, versatility and function. It is beautiful to behold and easy to install, with a price/quality ratio that knows no rival.

MIRO AUDIO. PERFECT FOR MIXED SYSTEMS AND TRANSFORMATION.

In the digital 2Voice version, Miro Audio adapts perfectly to its role of secondary indoor service station; in analogue systems Miro Audio is compatible with all 4+n systems and is the ideal choice to replace old door phones or to turn the old bell ring into an audio system.

BEAUTY AND FUNCTIONALITY: FREEDOM OF CHOICE

signo | signo

AUDIO

Minimal lines for a very thin design, by **Citterio**. Both in the door phone and video door phone versions, the line of **Signo** stands as the smallest on the market, with extremely reduced overall dimensions and only 5 cm in thickness.

Signo goes well with all settings thanks to its clear lines. The perfectly flat surface goes superbly well with the complete lack of angles: the profiles are rounded, just like the intuitive operation buttons (door opener and 3 auxiliary buttons for secondary services, e.g. staircase

light, secondary electrical lock opener, intercom call). Signo can be installed on the table using a stand.

Cabling is extremely simple and the user-friendly Urmet bracket system allows to apply Signo to all major analogue and digital systems.

The indoor station is fit for use by hearing impaired people wearing hearing aids that can capture the electromagnetic waves produced by the loudspeakers built-in into the indoor station.

A CLASSIC, NOW ALSO UNIVERSAL

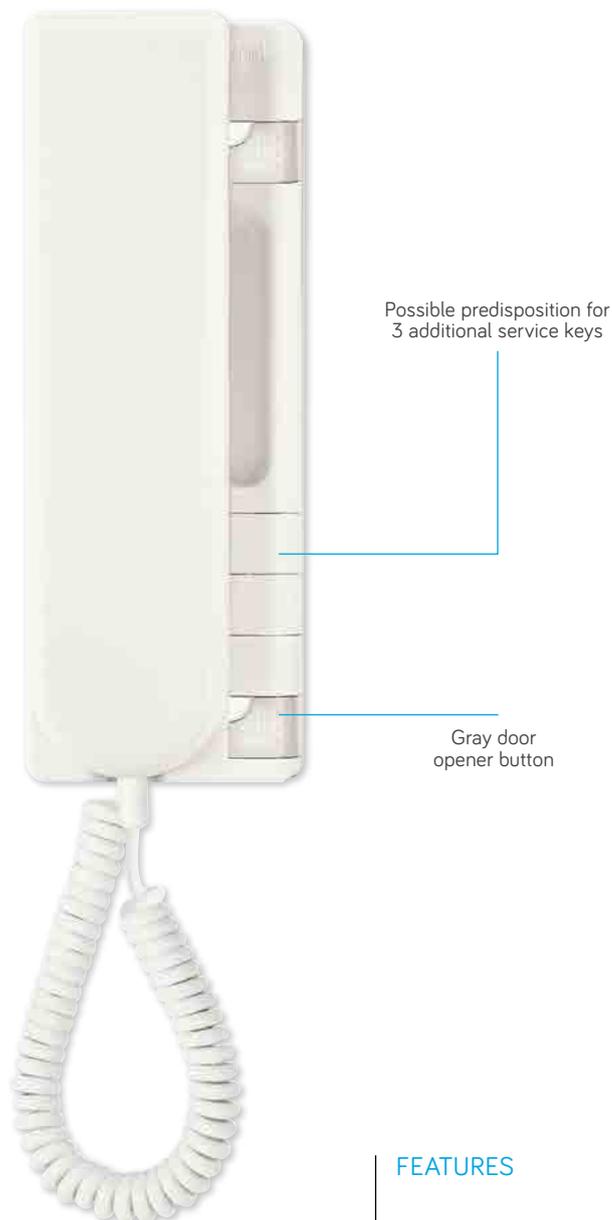

1130

Door phone **1130**, designed by **Giugiaro**, is a classic product to be used solely in traditional door phone systems, with buzzer call.

It is available in ivory or white and can be installed either on wall or table using the suitable accessories.

Moreover, it is fit for connection with electromechanical single-wire door phone exchange.

Its versatility makes it suitable to replace existing door phone systems model 1030, model 930 and model 730.

COMPATIBLE WITH

FEATURES

- > Usable in traditional doorphone systems with buzzer
- > Available in white or ivory colour
- > Suitable for replacing 1030, 930 and 730 models in existing system

TECHNOLOGY, STYLE AND CUSTOMISATION

Solidity, compactness, design and performance. Urmet entry panels meet all these requirements thanks to a comprehensive range of styles and functions. For digital and analogue systems, modular or one-piece, and classic or modern lines. The outdoor stations of the Urmet range are easy and practical to install, and are compatible with

all system types and with the technology and design styles that meet the diverse users' tastes.

SOLUTIONS FOR ALL DÉCOR
STYLES: PRESTIGE, HOME LUXURY.

Elekta Steel

The outdoor terminal of IPerVoice system with soft-touch interface, colour screen, directory and access control.

Elekta Steel

The technology offer of Elekta with a sturdy steel body for vandal resistance.

Titanium

The ideal choice to replace your old entry panel with class and a modern touch without changing the flush mounting box.

Titanium Digital

Titanium Digital Stylish call module monoblock panel for modern buildings. Size and shape easy customizable.

Allinox

Allinox Vandal resistant monoblock stainless steel panel MATT finishing with fast connection buttons.

Allinox Digital

Allinox Digital One of the thinnest call module in the market. Only 1,5 mm thickness out of the wall.

Exigo

An elegant choice, customised on the basis of customer's specific demands with top-quality materials and many personalisation options.

Exigo Digital

Thanks to the digital module, the Exigo series class is suitable also for large-sized systems.

Synthesi Steel

Synthesi Steel provides all functions enabled by Synthesi with the security of the vandal resistant function.

Synthesi S2

This modular entry panel suits all environments, provides access control and is designed for easy use by people with disabilities.

925

This audio and video entry panel for analogue system is strong and has stood the test of time, and also features a new design.

Range Mikra

One and two-family terminal, with compact and refined design; for flush or surface wall mount, different finishes available.

PROGRESS IS HERE

elekta

Elekta is the digital entry panel with **IP protocol** opening the door to **IPerVoice**, Urmet's digital system that takes the concept of video door phone systems to the next level. The unmistakable Urmet style features polished finish, top quality materials, smooth, stylish design lines.

Countless functions are presented on an aesthetically pleasing 3.5" colour display. Video door phone functions are supplemented with all advanced functions of the **Urmet IPerVoice** system: call from name directory, video message

with customisable logo, route indication from entry gate to selected residence, integrated video surveillance.

All this is available on the **Elekta** unit through convenient soft-touch controls arranged on the unit body that features rounded corners, chrome-plated edges and a smooth, polished surface lending it a uniform, stylish appearance. Elekta is flush-mounted entry panel for the digital **IPerVoice** digital system. It is very easy to install because there are no modules to be assembled.

TECHNOLOGY EXCELLENCE

elekta steel

Elekta Steel is the vandal resistant version of the IP digital entry panel Elekta. **Elekta Steel** has a one-piece polished steel body with flush moving elements: this design concept dramatically reduces the possibility of damage and lends it a sturdy, pleasant appearance.

Elekta Steel is strongly-built, it features IK09 impact resistance degree and IP45 protection degree against the infiltration of liquids and fine dust. **Elekta Steel** has earned its reputation for excellent technology and functionality on today's market.

As a matter of fact, it offers all active communication and security functions of the Urmet IPerVoice system along with passive security features that are unique to **Elekta Steel**.

The polished steel body is rust-proof and removal resistant. The mobile flush elements prevent liquid infiltration and protect the entry panel parts from damage; the integrated proximity key scan allows to effectively control all accesses. **Elekta Steel** requires flush installation and is secured to the wall with special Torx screws. Its compact one-piece steel body offers no pry points.

STRONG AND DURABLE

Titanium is the dedicated call module video panel compatible with 2VOICE and IPERVOICE systems. It is suited for flush mounting with dedicated embedding box. Titanium panel finishing and shape are customizable to fit in the best way inside the building structure. **Two finishings are available polished and satin.** Titanium panel size and shape are also customizable to eventually fit with existing embedding box and avoid expensive hand-work on the wall.

Prodel is an Urmet Group company based in Turin and specialized in custom panels. Prodel controls 100% of

manufacturing process from design to manufacturing of custom panels based on electronic from Urmet Group to fit various customer demands. In IperVoice and 2Voice systems Titanium panel allows to have minimum depth panel with **only 3 mm out of the wall**. Titanium can integrate in the same panel electronic from different Urmet Group companies, e.g. FDI keypad can be joined to Urmet Mikra video call module. TITANIUM product line resumes on the same panel the highest quality and elegance available in the market and customization requirement to fit in the best way with customer demands, avoiding expensive hand-work on the wall.

COMPATIBLE WITH

FEATURES

- > 2Voice and IPerVoice vandal-proof call module
- > 3 mm thickness single block structure panel
- > Available in satin and polished finishing
- > Antioxidation treatment
- > Customizable (shapes, engraving, sizes, finishings)
- > Eventually adaptable to existing embedding box
- > Integration of Urmet group electronic in a single block structure panel

titanium Prodel

URMET|GROUP

WELCOME STYLE.

Titanium is the classy vandalproof entry panel, compatible with Urmet's IPerVoice 2Voice digital systems. Available with a glossy or matt finishing, fully customisable, Titanium adapts to any context and allows the reuse of available flush mounting boxes. Titanium is just 3 mm thick. The robust and durable structure guarantees high resistance to atmospheric agents. The panel body structured is secured by an exclusive treatment that prevents corrosion and oxidation.

Titanium allows the integration of multiple devices into one a single Urmet front panel and is the perfect solution to renew existing installations, getting the class and the design of an artistic entry panel with no need of masonry. Titanium offers customized solutions and it combines perfectly the elegance of forms with the technology of the most advanced Urmet communication systems.

ALLINOX / ALLINOX DIGITAL REFERENCES

ALLINOX

Allinox is the new family of monoblock with fast connection buttons on 2,5 mm thickness. Manufactured in **Matt** finishing stainless steel, **Allinox** panels can be customized in shape and size. Any Urmet electronic could be mounted, including **IPerVoice**, **2Voice** and analogue systems. In addition, **ipassan** and **Easy door controller**, integration is available as well as 3° party electronic. Logo and street name can be laser engraved. New button system of connection is used in **Allinox** panel, allowing fast installation screw less for **IPerVoice** and **2Voice** using faston connections of 1083/17. For analog systems or 3° party door phone systems special terminal plug-in is provided to easily connect the wire column with panel buttons, allowing simple one-time terminal plug-out to disconnect all wires from the panel.

ALLINOX DIGITAL

Allinox digital is one of the thinnest panel in the world with 1,5 mm thickness only out the wall. Manufactured in **Matt** finishing stainless steel, **Allinox Digital** panels can be customized in shape and size. **IPerVoice** and **2Voice** digital call module can be integrated. In addition, **ipassan** and **easy door controller**, integration is available as well as 3° party electronic. Logo and street name can be laser engraved. Embedding box included can be sinthesi model 1145, or special version to allow hidden screws fixation.

treatments. **Exigo** is top-notch quality: a quality you can touch and feel.

Exigo is the entry panel that offers endless customisation options and refined finishes, in polished and satin-finished brass with steel-chrome, gun-metal grey, copper bronze, micaceous iron colour finishes. Even shapes can be customised to each user's preferences.

COMPATIBLE WITH

IDEAL FOR: ANCIENT BUILDINGS
RENOVATED BUILDINGS DETACHED
HOUSES SEMI-DETACHED HOUSES

MORE BEAUTIFUL, SMARTER, STRONGER

Class is timeless: this is why Urmet designed a range of entry panels that are guaranteed to maintain their appearance over time.

This is achieved thanks to high-quality materials and treatment technology: the brass entry panel blanks are first electro-plated and then undergo PVD treatment.

The Physical Vapour Deposition technology uses an electrochemical treatment to coat products

with a titanium layer that lends them the utmost resistance to weathering agents and wear.

This ensures that Urmet brass entry panels will remain unaltered over the years and look just like the first day.

The same high standard of care is found in details, such as the labels mounted on the reverse side for improved aesthetics and enhanced vandal resistance.

FEATURES

- > Compatible with the 2Voice and IperVoice digital systems and all analogue systems
- > PVD anti-corrosion and anti-oxidising treatment on audio and video versions.
- > Polished and satin-finished brass

- > Colour finishes: chromed, gold PVD, copper bronze PVD, gun metal PVD, 9010 RAL white, 9007 RAL aluminium, 8028 RAL corten, micaceous iron, 9005 RAL black
- > Retrofits to all Urmet entry panels and to third-party entry panels at request

ELEGANT ENTRY PANELS THAT ARE ADAPTABLE TO EXISTING EMBEDDING BOXES

PVD TREATMENT

Urmet, thanks to its subsidiary Prodel, is the only company of the sector which performs in-house the whole PVD production cycle. This allows the company to offer products with extremely reduced delivery times and with the most competitive prices on the market. Moreover, only the internal production control allows to offer the maximum quality and the optimum treatment performance.

A harmonious, consistent style enhances the class of a building. Exigo adapts to the building's architectural style and offers:

- > Rounded shapes for ancient buildings
- > Square shapes for the most contemporary buildings
- > A matching line of bells and signs to achieve a consistent building style from main entrance to apartment door.

Brass engravings in two typestyles: a sober AERO or the calligraphic SL43 typestyle for information and indications such as street name, building number, warnings and all label names, available in brass or anthracite PVC.

A historic building name or other information may be engraved on the top and bottom area of the front panel for an uncluttered appearance with no need for additional signs.

Note: Please contact sales network to enquire about custom engravings and special typestyles.

PT1039/18/EXWAL

STEEL'S MOST ELEGANT SHAPE

Sinthesi Steel is style designed for security. The new **Urmet** entry panel features advanced vandal resistant protection, as well as its typical operating versatility.

Its polished steel body with flush elements dramatically reduces the possibility of tampering. Its impact resistance is rated **IK09**, its protection against the infiltration of liquids and fine dust is rated **IP45**. The wide-angle colour camera allows for long-range video recording.

UNPARALLELED QUALITY AND RESISTANCE

Sinthesi Steel still features Sinthesi's typical modular characteristics, with a more stylish look and even more security features. The wide-angle camera features a shooting angle of 120° (horizontal) and 90° (vertical).

sinthesi steel

Its polished steel modules are treated to resist corrosion and is vandal-resistant, thanks to its special Torx screws. Its flush moving elements resist the infiltration of fluids and prevent entry panel damage or removal, highlighting the manifest sturdiness and style of new **Sinthesi Steel**.

Sinthesi Steel needs recessed or surface wall mounting in appropriate housing boxes. Installation is quick and easy as all modules snap onto the wall frame and no additional tools are required. Wiring of digital system is done with simple flat cables.

Sinthesi Steel may also be used as a system upgrade, since it features Sinthesi's outdoor analogue stations interface as well as Urmet's Sinthesi and K-Steel flush-mounting boxes.

COMPATIBLE WITH

SMARTER, STRONGER, MORE BEAUTIFUL

BEAUTIFUL AND COMPACT: INSTANTLY ATTRACTIVE

Sinthesi Steel is beautiful, refined and features a sober, unique design: it is the ideal entry panel to create a contemporary style welcome for guests. Its flush design and the absence of interstices between each element lend Sinthesi Steel a compact and elegant look.

ACCESSIBLE AND INTERACTIVE: DESIGNED FOR EASY USE BY PEOPLE WITH DISABILITIES

Thanks to speech synthesis modules, LED indicator module and interface modules for induction loop antenna for hearing-aid users, disabled persons, the sight-challenged and the hearing impaired can use the system normally. Proximity and access control modules provide keyless entry functionality for entrance gates and doors.

FEATURES

- > Vandal resistant steel body, with flush buttons
- > Compatible with sinthesi and k-steel flush-mounting boxes
- > Wide-angle camera 120°
- > White back-lighting and customizable name tag colours
- > Mechanical impact resistance degree: IK09
- > Compatible with analogue sinthesi outdoor stations
- > Pre-wired modules
- > IP45 protection degree (ingress of solid objects and water)

sinthesi steel

MODULAR AND VERSATILE: SUITABLE FOR ALL TYPES OF BUILDINGS

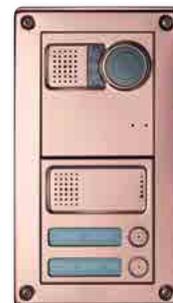

Sinthesi Steel is compatible with Sinthesi and K-Steel and uses the same analogue outdoor stations as Sinthesi. Modules can be combined at will. The panel has snap-on assembly, the only screws are located on the outer frame.

STURDY AND SAFE: IT FEARS NOTHING AND PROTECTS EVERYONE

Sinthesi Steel's steel structure is impact-resistant (IK09 rating) and water jet resistant (IP45 class) and will withstand any weather conditions. The wide-angle camera unit has a 120° angle of view. Proximity sensor modules allow for quick access by authorised persons.

COMPATIBLE WITH

DESIGN, FUNCTIONALITY AND EASE OF USE

synthesi S2

Synthesi S2 is Urmet's modular entry panel, improved-quality finishes and a revisited aesthetic impact featuring cleaner and more outstanding features. With Synthesi S2, Urmet revamps the most wellknown and appreciated entry panel on the market, improving its functionality and performance. The innovative and stylish finishing of this aluminium entry panel lends it a more refined look, while the colour camera units and

the new module range now offer a wider range of technical features to choose from. More beautiful, because finished aluminium lends it a slick and unique look, while the green backlighting is a bright and modern way to greet visitors. Easier, thanks to its simplified wiring and the possibility to replace name tags and carry out audio and video adjustments even after the entry panel has been installed.

URMET'S QUALITY TAKES ONE STEP FORWARD

925

Great ease of installation and excellent quality/price ratio make this entry panel very competitive. It comes with drawn aluminium front panel with plastic headers, button holder frame with metal buttons and flush-mounting box.

The entry panel is arranged in blocks with one or two rows that can be set side by side to achieve 3, 4, 5 and 6-row setups. In addition, appropriate housings are available for surface wall mount in configurations with up to 24 buttons.

COMPATIBLE WITH

MAIN FEATURES

- > Flush entry panel for flush mount / surface wall mount
- > Aluminium front panel
- > Compact size
- > IP33

MODERN, STRONGLY-BUILT, VERSATILE

PREMIUM PERFORMANCE, IN EVERY WAY.

Mikra was designed for one and two-family users and it embodies a revolutionary notion of outdoor video door phone system entry panel design. Mikra embodies a purely modern style, thanks to its compact design and to its structure made of Zamak, which protects it against unfavourable weather conditions and gives it a pleasant and sturdy feel.

Mikra is available in the audio and video version and also in the Mikra Exigo model with the polished or satin-finished brass, steel or iron mica front panel. Mikra has a compact shape and outstanding performance.

Mikra video has a strong and resistance satin-finished Zamak body. Because of it Mikra was given the IK07 grade for shock

resistance and IP44 grade for liquid and micro-dust infiltration resistance.

The audio-only version features an aluminium front cover. The Mikra Exigo version features top-quality finishes: brass and steel with polished and satin finishes or iron-mica. The audio-video version camera is equipped with an LED lighting system for sharp and clear footage also during the night.

All Mikra versions are compatible with Urmet's 2Voice system and with analogue 2-wire systems. Mikra is compatible with surface wall mounting, semi-flush installation or, thanks to its compact size, 10cm wide plate mounting. Mikra Exigo versions are flush-mounted.

FEATURES

MIKRA

- > Zamak alloy
- > IP44 protection degree
- > Integrated outdoor station: video
- > Preset for 2-call management
- > Surface wall mount
(flush mount possible with kit 1122/60)
- > White LED back-lighting
- > Mechanical impact resistance degree: IK07

MIKRA AUDIO

- > IP44 protection degree
- > Preset for 2-call management
- > Surface wall mounted (possibility of flush-mounted installation with 1122/50 kit)
- > White LED back-lighting

MIKRA EXIGO

- > IP44 protection degree
- > Integrated outdoor station: colour video
- > Preset for 2-call management
- > White LED back-lighting with customization options

VILLA KIT MINI NOTE+ KIT AND CALL FORWARDING

THE VIDEO DOOR PHONE YOU CAN OPERATE FROM YOUR SMARTPHONE

The call forwarding device allows to manage video door phone calls from your smartphone and tablet at and away from home. Just pair the Urmet **CallMe app** with the device installed in the video door phone to activate the smartphone call forwarding function. With the call forwarding function you will see who's calling on your phone, open the door or the driveway gate, activate the

mute function on the local microphone on your smartphone and end the conversation. The call forwarding device allows you to receive calls from outdoor stations, from the exchange or the video door phone in the apartment and can be mounted on DIN rails or on the wall using the suitable accessories. Each apartment can have up to 4 mobile devices for call forwarding.

SINGLE-FAMILY MINI NOTE+ KIT WITH CALL FORWARDING DEVICE

The **Mini Note+** kit consists of a Mikra entry panel and CX Modo 7" touch screen monitor. Simple to install and use, it also includes building automation functions thanks to the integration with the Yokis technology. - The kits include:

- > 1x Ref. [1722/111](#) - Mikra wall-mounted entry panel made of Zama with CCD colour camera and outdoor station
- > 1x Ref. [1722/87](#) - CX Modo 7" touch screen monitor
- > 1x Ref. [1722/20](#) - 2Wire power unit
- > 1x Ref. [1722/58](#) - Call forwarding device

2WIRE

Cx Modo contains a **Yokis** transmitter module that radio connects directly with the receiving modules in the electrical system to manage up to 8 services and 4 scenarios.

Thanks to the integration with Yokis building automation, the **Mini Note+** kit can manage central controls, timing of indoor and outdoor lighting, window shutters as well as some other functions, **such as garden irrigation, light and shutter management.**

WHY CHOOSE IT? Because it's the ONLY one that:

- + Operates with any device, also audio, in the 2Voice range
- + Does not require replacing the existing device
- + It does not require local power supply in systems with up to 12 users
- + It allows intercom calls
- + It also features a RJ45 port for wired connection as an alternative to wi-fi connection

Fitted with RJ45 port for wire connection, if WiFi should not be available or the Urmet CallMe APP was out of range; designed for final users, it forwards video door phone calls onto your smartphone.

You can answer your video door phone from the APP, as well as open the door and driveway gate and activate the mute function on the local microphone, if needed.

IP VILLA KIT

FEATURES

- > Preset to manage second call from entry panel
- > Possibility of adding 2 supplementary buttons to each door phone for a total of 3 for operating secondary services
- > Possibility of managing up to 2 audio inputs with the addition of relay box 788/51, entry panel 1122/1 (single-family)
- > Up to 2 door phones in parallel

- > Max distance 300 m
- > Power supply 12 Vac

REQUIREMENT

- Installing an audio system with 1 or 2 inputs for single or two-family house systems

SYSTEM BASE KIT

Available with synthesis entry panel, Urmet's expandable single and two-family kits create a system capable of growing along with building needs, by the simple addition of button modules.

All door phones and video door phones in the expandable kit series come with supplemental buttons to offer improved flexibility in terms of functions and operation.

Urmet presents its offering describing the ideal application for each kit: each package represents a solution that offers the advantages and convenience of ready-to-install base components.

Synthesi
S2

VANDAL RESISTANT STEEL AT THE PRICE OF ALUMINIUM

Synthesi Steel is a vandal resistant steel modular entry panel ensuring simple installation and sheer resistance at a very convenient price compared with the base aluminium version. Its one-piece polished steel body with flush elements dramatically reduces the possibility of tampering.

For further information on Synthesi Steel customisation options, please contact PRODEL at +39 011-2484103 or write to info@prodeltorino.it for a personalised quote.

Synthesi Steel is available in PVD colours

COMPATIBLE WITH

MAIN FEATURES

- > All base system components come in one package
- > Broad choice of design styles
- > New 2Voice kit series

2 voice | BASE SYSTEM KIT: 2VOICE

The kits with synthesis entry panel can be used to build systems in single and two-family houses both as a system base for apartment buildings or for residential complexes.

The kits can be expanded thanks to the modular entry panel that can be expanded with additional modules, and because they use common devices found in Urmet systems such as 2Voice and the 5Wire video system.

FROM TELEPHONY TO COMMUNICATION SOLUTIONS

Telephony evolves with its functions into a tool capable of meeting a growing number of needs. Urmet's interfaces (GSM, VoIP) and telephone integration modules offer multiple advantages.

Fully hands-free operation for the utmost flexibility: simple Sinthesi outdoor station modules with integrated telephone functions provide a door opener system with advanced

functions (multiple access management, light/camera activation, day/night, remote call), connection to PABX exchanges with intercom function. Significant saving: Urmet's innovative GSM and VoIP interfaces support alternative, low-cost telephone networks.

The new VoIP devices support communication over the Internet using a simple ADSL line.

IP GATEWAYS DEVICES

Urmet expand its telephony offer adding a new line of VoIP interfaces for traditional lines and extensions. The IP/SIP Urmet interfaces allow VoIP management for traditional lines: RTG, ISDN, GSM and analog telephone. VoIP has radically changed the communication world making use of existing Local Area Networks. VoIP technology has developed enormously over the past years in terms of quality

and reliability. Voice communications over the Internet have become easy with VoIP: all you need is an ADSL connection to speak with anyone using the same system, at no additional costs. With such devices, it's possible to manage / share local lines in remote and centralize through VoIP technology or interfacing traditional PBXs with VoIP providers.

MAIN FEATURES

- > Multiple SIP account
- > Caller ID and Name display (if in phonebook)
- > Fax management with T.38 protocol or Pass-through
- > LED indicators for lines or extensions status
- > Powered by external power supply

TELEPHONE INTERFACES

A MONEY SAVER

Telephone interfaces are devices which allow to connect telephone terminals to other equipments or communication networks. Specifically, we have door phone/ telephone interfaces for door phone system applications,

“GSM/GPRS” interfaces for using the GSM network and “Telephone loudspeaking units” for integrating any telephone switchboard (PABX) with a “Sinthesi” loudspeaking unit. Each interface can offer various integration needs.

Door phone /telephone interface 1332/40

Telephone loudspeaking unit 1148/1

GSM interface 4203/11

MAIN FEATURES

- > Communicate anytime, anywhere
- > Save money on telephone calls
- > Simple installation
- > Flexible management

DOOR PHONE/ INTERFACES

This device is used to allow communication, also at the same time, with a telephonic line and a loudspeaking unit using a single telephone and allowing to open the door. With a cordless phone, you can take incoming calls from anywhere in your home, e.g. from the garden, the balcony

or the loft. Specifically, the door phone interface 1332/40 offers various installation solutions: direct power from loudspeaking unit, management of two door units, door unit call confirmation tone, etc.

INTERFACES

<p>1332/40 </p>	<p>4+N - PSTN TELEPHONE AUDIO INTERFACE Interface device for telephone lines and door phone systems and replaces the 1332/30. One device connected to an analogue dial line and 4+n door phone system (this device must be connected to other dedicated interfaces). Allows to manage telephone and door phone calls to a single telephone terminal. Set up for connecting to two loudspeaking units and equipped with two relays for opening the door or for auxiliary services. Supplies power (+6Vdc) to a PE and different operating modes, programmable directly from the connected phone.</p> <ul style="list-style-type: none"> > Power: 12 Vac > Minimum consumption: 3/10VA > Installation: DIN bar > Dimensions (mm) 108 x 90 x 55 (W x H x D) (6 DIN modules)
<p>1083/67</p>	<p>2VOICE - PSTN AUDIO AND VIDEO INTERFACE This device allows to connect an analogical telephone or a telephone interface or a PABX to a 2Voice system, to be able of using interphone services also through a telephone terminal. The video is supplied on a coax-type output for connection of compatible terminals. This interface can be programmed in two modes: "internal place" or "call forwarding" as an aid to the 1083/40 gatekeeper lodge exchange.</p> <ul style="list-style-type: none"> > Power supply: 110/230Vac with power supply provided with kit > Size: 10 DIN modules > Size of Power Supply: 1.5 DIN modules

1332/40

TELEPHONE INTERFACES

TELEPHONE LOUDSPEAKING UNIT

This is a Sinthesi S2 module device with a 1 or 2 button basic configuration and 4 expansion buttons. It may be used as a normal analogue extension connected to a PABX and may be directly connected also to a GMS interface for monitoring remote accesses. The installation structure and the many available functions

make it particular flexible and suited for applications in places hands-free conversation and reception is needed, e.g.: sterile rooms, outside, safety environments, etc. Furthermore, a wide variety of applications are possible using two relays: management of two locks, one camera, a light or a bell.

1148/1

1148/2

1148/4

1148/6

TELEPHONE LOUDSPEAKING UNIT

SINTHESI S2 MODULE 1 BUTTON WITH TELEPHONE LOUDSPEAKING UNIT

Basic module, 1 button with built-in loudspeaking unit. Capable of managing up to 64 buttons. Each calling button may be associated with up to 2 numbers (day/night) of 16 digits each, password protected programming, pulse or tone dial, auto-on, 2 independent actuator relays configurable for different applications, automatic power on with externally power name tag lights. Adjustable speaker and microphone volume.

1148/1

- > Degree of protection: IP42
- > Min power voltage/current: 18Vdc/18mA
- > Light power: 12Vdc/10-12Vac
- > Max. light current: 300mA
- > One Sinthesi module in size
- > Supplied without flush-mounting box, frame or module holder case

SINTHESI S2 MODULE 2 BUTTONS WITH TELEPHONE LOUDSPEAKING UNIT

Basic module, 2 buttons with built-in loudspeaking unit. Capable of managing up to 64 buttons. Each calling button may be associated with up to 2 numbers (day/night) of 16 digits each, password protected programming, pulse or tone dial, auto-on, 2 independent actuator relays configurable for different applications, automatic power on with externally power name tag lights. Adjustable speaker and microphone volume.

1148/2

- > Degree of protection: IP42
- > Min power voltage/current: 18Vdc/18mA
- > Light power: 12Vdc/10-12Vac
- > Max. light current: 300mA
- > One Sinthesi module in size
- > Supplied without flush-mounting box, frame or module holder case

EXPANSION MODULE 4 BUTTONS

4 buttons module with basic module expansion 1148/1 or 1148/2 and integrated loudspeaking unit. Degree of protection: IP42. One Sinthesi S2 module in size. Supplied without flush-mounting box, frame or module holder case.

1148/4

NUMERIC KEYPAD EXTENSION MODULE WITH TELEPHONE LOUDSPEAKING UNIT

Numerical keypad module for expansion of the basic modules 1148/1 or 1148/2. The keyboard has two basic options for dialing telephone numbers: direct dialing of telephone numbers (by pressing the numbers on the keyboard as you would a telephone - maximum 24 characters) and selection from the memory of the intercom system (press only two characters on the keypad, ie an address stored between 01 and 99). This option allows to reduce the number of buttons used for direct dialing of numbers in memory if the system provides for a large number of users. It is also possible use the keypad to type in the opening codes of the gates associated with the station telephone extensions. Up to 99 numbers can be stored for daytime use and 99 numbers for night use. Ability to activate the DTMF composition during one telephone conversation. With any programming, the «X» key closes the conversation or cancel.

1148/6

- > Degree of protection: IP42.
- > It occupies the space of 1 Sinthesi S2 module.

USB PROGRAMMING PC INTERFACE FOR TELEPHONE EXTERNAL PANEL

USB interface needed for programming the telephonic door stations Sinthesi S2. The configuration software and the USB driver for the interface recognized by the PC can be downloaded from the download www.urmet.com

1148/9

TELEPHONE INTERFACES

GSM INTERFACES

“Domus Cell” GSM connect an analogue or traditional analogue line of a PABX with the mobile GSM network, thus generating mobile-to-mobile traffic (instead of land line-to-mobile) which allows to save on telephone costs by exploiting better fees. The device is also useful as back-up emergency line. “Domus Cell basic” can be used

to communicate in ease using a table-top telephone also where no land line is available as long as an adequate GSM mobile network coverage is ensured. The “Basic” model is ready for managing voice communications. A SIM card (3V and 1.8V) for mobile communication like the one used in a normal GSM telephone is required for operation.

GSM INTERFACE

4203/11		<p>DOMUS CELL BASIC 2 GSM INTERFACE</p> <p>The device allows to route voice communications between analogue line (PABX or analog telephone), and GSM telephone network (900 and 1800). Features: selection by DTMF and pulse; Caller ID (CLI) with standard BT FSK, FSK Bell and DTMF; outgoing calls block; programmable by phone or by PC with ref. 4203/50 optional board.</p> <ul style="list-style-type: none"> > Dimensions (mm) 94 x 64 x 29 (W x H x D) (excluding antenna) > Weight: 105 grams (adapter not included) > Power: 230Vac with adapter > Installation: wall mounted
4203/50		<p>USB INTERFACE FOR DOMUS CELL BASIC 2 4203/11</p> <p>It allows to interface the device 4203/11 to the PC USB port, for a easiest configuration via software. The application software for Windows OS is supplied on CD (updated versions are available in the area of the site www.urmet.com)</p>

SURGE PROTECTIONS AND FILTERS

SURGE PROTECTION DEVICE FOR 230 VAC - 400 VA

Power supply Replaces UTD1332/80. The device protects electric and electronic equipment from current surges and interferences on the 230Vac power supply line. Thanks to the certification pursuant to European regulation EN61643-11/A11, the device guarantees a high degree of protection, eliminates the "FOLLOW CURRENT" phenomenon and reduces the risk of service downtime. The device can be reset via micro-switch and features a warning LED that turns on to indicate that the protection is active.

1382/80

- > Test class: 3 Max. load: 400VA
- > Installation: DIN bar (2 modules) or wall-mounted
- > Dimensions (mm) 36 x 103 x 57 (W x H x D)

SURGE PROTECTION DEVICE FOR 230 VAC

Replaces UTD1332/80. The device protects electric and electronic equipment from current surges and interferences on the 230Vac power supply line. Thanks to the certification pursuant to European regulation EN61643-11/A11, the device guarantees a high degree of protection, eliminates the "FOLLOW CURRENT" phenomenon and reduces the risk of service downtime. The device can be reset via micro-switch and features a warning LED that turns on to indicate that the protection is active.

1382/85

- > Test class: 3 Max. load: 400VA
- > Installation: DIN bar (2 modules) or wall-mounted
- > Dimensions (mm) 36 x 103 x 57 (W x H x D)

MAINS FILTERING DEVICE, 230VAC, 4000VA

The device prevents the propagation of radio-frequency interference on the power network which could cause faults to electronic apparatus sensitive to such interference. For better results, use with protection device Ref. 1332/85 is recommended to exploit their complementary action.

1332/86

- > Power: 230Vac - 50Hz Attenuation: 60dB @ 2MHz. Max. current 20A
- > Max. load: 4000VA Installation: DIN bar, 2 modules.
- > Dimensions (mm) 36 x 90 x 58 (W x H x D)

PROTECTION DEVICE FOR 1 ANALOGUE TELEPHONE LINE

Replaces UTD1332/81. This device protects telephone switchboards (PABX) from power surges and induced disturbances from the telephone line connected to the PSTN network. Thanks to the certification pursuant to **European regulation EN61643-11/A11**, the device guarantees a high degree of protection.

1382/81

- > Load: 1 analogue telephone line
- > Installation: DIN bar (2 modules) or wall-mounted
- > Dimensions (mm) 36 x 103 x 57 (W x H x D)

PROTECTION DEVICE FOR 2 ANALOGUE TELEPHONE LINES

Replaces UTD1332/82. This device protects telephone switchboards (PABX) from power surges and induced disturbances from the telephone line connected to the PSTN network. Thanks to the certification pursuant to **European regulation EN61643-11/A11**, the device guarantees a high degree of protection.

1382/82

- > Load: 2 analogue telephone lines
- > Installation: DIN bar (2 modules) or wall-mounted
- > Dimensions (mm) 36 x 103 x 57 (W x H x D)

SURGE PROTECTION DEVICE WITH "ADSL 2+" FILTER

The device integrates the functions of a telephone line surge protection and of a professional ADSL 2 filter (splitter). For maximum efficiency, install the protection on the telephone line near the PABX to be protected. The device will trip in presence of dangerous current surges on the line.

1382/21

- > Installation: wall mounted on DIN bar, 2 modules
- > Dimensions (mm) 36 x 104 x 75 (W x H x D)

SURGE PROTECTIONS, FILTERS AND SYSTEM ACCESSORIES

SYSTEM ACCESSORIES

4850/1		<p>SUPPLEMENTARY ELECTRONIC RINGER Supplementary electronic ringer for wall installation, high acoustic efficiency and adjustable volume and sound frequency. Can be connected to telephone line using RJ11 plug and terminals, fixed to wall or installed in flush-mounting boxes 502 and 503, self-powered from telephone line, three different selectable sound frequencies.</p> <ul style="list-style-type: none"> > Dimensions (mm) 145 x 101 x 42 (W x H x D)

iPer Home

HOME
AUTOMATION

IPerHome HOME AUTOMATION THE URMET'S WAY

Communication, security and cost-efficiency within a single modular and flexible system.

New horizons and many possibilities for the design, installation and use of technological systems.

IPERHOME OFFERS MORE COMFORT, FUNCTIONALITY, CONTROL AND COST-EFFICIENCY.

EASY TO DESIGN, RE-DESIGN, INSTALL, MODIFY AND USE.

MORE QUALITY TO YOUR LIFE

Comfortable, safe, smart. With IPerHome, your house will simplify your life, adjusting to every moment, every day, every season. IPerHome improves the quality of your life by improving the efficiency of the energy systems and allowing their remote control.

A SYSTEM BASED ON A SINGLE WIRING

The IPerHome devices are linked to a field bus that may be composed by different wiring types.

TECHNOLOGY AT YOUR SERVICE

IPerHome perfectly integrates communication systems, security and cost-efficiency. With IPerHome, your systems will communicate to adapt to your routine, to protect your family and give you more comfort.

COMPATIBLE WITH THE MOST COMMON WIRING SYSTEMS

All the devices composing IPerHome are placed in flush-mounting boxes, junction boxes or electric panels, and they can be combined to standard buttons, control devices and sockets. This is why IPerHome is compatible with the wiring systems of the leading manufacturers.

A SMART AND SCALABLE SYSTEM

IPerHome is a modular system, as it works without control units and makes you implement, change and widen your system's functionalities whenever you need, without having to operate on the system's architecture or to modify the wiring. This brings four great advantages:

URMET VIDEO-DOORPHONES ON BOARD

The digital video-doorphones 2Voice and IPerVoice are designed to be combined with the IPerHome system. Their integration is simple and just as efficient as the top quality communication and security services that we offer to our clients.

- > Low installation cost
- > Implementation of the necessary functions only
- > No building works for further modifications
- > Higher reliability, thanks to the independence and autonomy of every component.

INTEGRATION WITH THE SECURITY SYSTEMS

IPerHome can easily control the Urmet 1067, Elkrone MP500 safety systems, and many more from the leading manufacturers.

OUR BEST FOR YOUR ENERGY SAVING

IPerHome makes you reach the highest performances defined by the CEI 64-8 and EN15232 regulations, making you save up to 26% for heating and conditioning systems, and up to 15% for the electric consumption.

IN COMPLIANCE WITH THE HBES REGULATIONS

The IPerHome output modules are designed in compliance with the technical regulations of the European Committee for Electronic Standardization for HBES systems (Home and Building Electronic Systems), and in particular to regulations EN 50428, EN 60669-2-1 and EN 60699-1.

IPERHOME FUNCTIONS

01.

Lights and sockets automation

To turn on or off the external and internal lights, the power sources of the sockets and the lights of the rooms depending on external conditions.

02.

Shutters automation

To control the opening and closing of shutters and blinds.

03.

Light intensity adjustment

To adjust the light intensity for any kind of lamp (directly or in programmed mode) thanks to a module that interfaces to many of the different dimmer types available.

04.

Electric load control

To control at any time the activation of the electric loads. This function can be programmed and timed.

05.

Thermoregulation

A split management of the heating and conditioning systems provides the optimal temperature any time to every room.

06.

Metering of energy consumption

It is possible to check the instant consumptions of gas, water and electricity.

07.

digital video-doorphones

To connect the digital video-doorphones Urmet 2Voice and IPerVoice, and to benefit of all the services they imply.

08.

Intrusion alarm

It is possible to connect the intrusion alarm, to manage and control its function remotely, and to programme it depending on the temporary environmental parameters.

09.

Video surveillance

To manage the surveillance cameras and view the images also remotely.

10.

Remote control

IPerHome can be connected to the Internet, to manage and set the functions from a PC, tablet, smartphone and smart TV through a simple web browser.

11.

Music library management

You can store and play your favourite tracks and play lists through an audio system connected to the IPerHome server. Your tracks can be stored on a NAS linked to the home network, or on the hard disk of a Server Pro.

12.

Technological alarms management

To receive an e-mail or SMS notification in case of a malfunction of one of the devices managed by IPerHome or in case of faults in the water, power, gas and other supplies.

YOUR HOUSE REVOLVES AROUND YOU

IPERHOME LETS YOU SET UP THE COMBINED FUNCTIONING OF THE DEVICES CONTROLLED BY THE SYSTEM TO CREATE YOUR SCENARIOS: FROM LIGHTS AND APPLIANCES TO THE OPENING OR CLOSING OF SHUTTERS AND BLINDS; FROM THE ACTIVATION OF CONDITIONING SYSTEM TO THE CONTROL OF THE SECURITY ONES, LIKE VIDEO SURVEILLANCE AND INTRUSION ALARMS. THE SCENARIOS CAN BE ACTIVATED AS FOLLOWS:

LOCALLY

In case you don't have an IPerHome server, during the installation you can create fixed scenarios to activate through wall buttons or control monitors.

REMOTELY:

Using an IPerHome service and the interaction interface, you will be able to modify the settings through any fixed or mobile device connected to a web browser.

THESE ARE SOME OF THE SCENARIOS YOU WILL BE ABLE TO CREATE

SCENARIO 1
/ GOOD MORNING

Before you wake up, the system turns off the external lighting and sets climate control in the bathroom and kitchen; opens the shutters in the living area of the house and, after a few minutes, even the ones in the bedroom area. Power sockets of the coffee machine and TV in the kitchen are powered on. The perimeter intrusion alarm system is disabled.

SCENARIO 2
/ CINEMA

The system turns off the lights in the bedroom area, powers on the home-theatre system, lights in the living room are soft and cosy; shutters close and perimeter security system is armed. The climate control system sets the right temperature according to the weather.

SCENARIO 3
/ PARTY

You go out: the system closes the shutters, the intrusion alarm system is on in perimeter and volumetric mode, lights are off and all electric items, except the fridge and the freezer, are powered off. The system arms external video surveillance and the internet connection that will allow you to check room and system status.

SCENARIO 4
/ GOOD NIGHT

The climate control system for the bedroom area of the house is specially set. The system closes the shutters, turns the lights off except, until a certain time and with a low intensity, the ones in the bedroom. The intrusion alarm system is armed in perimeter mode. The system starts the operating cycles of washing machine and dishwasher.

REMOTE CONTROL LOCAL CONTROL OF THE SYSTEM

WALL CONTROLS: SIMPLICITY AT ONE CLICK

It's easy to control IPerHome thanks to the normal buttons and wall control devices. A click is all it takes to activate a scenario, to modify the conditioning settings or to turn on and dim the lights. IPerHome is

compatible with most of the wiring systems available on the market. Together with Simon Urmet's Nea system, it is possible to have elegant blue LED buttons that indicate the state of the associated function.

nea

MONITOR CONTROL: MORE POWERFUL, MORE EXTENDED

An Urmet Modo or Max monitor will make your IPerHome experience even more enjoyable. The graphic interface is simple and intuitive. Moreover, besides the useful functionalities of the Urmet video-doorphones,

the monitor offers the possibility of controlling the energetic consumptions, the video surveillance and to manage the system through a map of the house.

REMOTE CONTROL

FOR PC, SMARTPHONE, TABLET AND SMART TV

By connecting the IPerHome server to the Internet, you will be able to control your system wherever you are. The IPerHome software allows control via Internet browser, and therefore guarantees universal compatibility, with non-up-to-date devices as well.

All functions of your IPerHome system are thus available through PC, tablet, smartphone and smart TV, via the web browser installed on the device used to establish the connection.

YOUR HOUSE AT A CLICK OF THE MOUSE

To enable the remote control, you can register a third-level domain namesurname.iperhome.com.

By browsing this address, you will access the system and the remote control through a safe and coded connection.

1071/13

1071/14

INPUT MODULES

		MODULE FOR EIGHT CONTROL SWITCHES The module detects the activation or deactivation of the wall switches, and sends the signal to the output modules through the bus. Each module of this kind connects eight switches (or four double-function switches), and thanks to its small size it can be installed in a three or four-module flush-mounting box, or to a 2.3 inches diameter one. > Dimensions in inches 1.5 x 1.1 x 0.5 (W x H x D) - rated CUs: 1
1071/18		
		NOTIFICATION LED In case you are using the Simon Urmet's Nea wiring system buttons, you can use this device to receive from the switch a LED notification about the state of the system.
1071/17		
		SEVEN-INPUT MODULE FOR CONSUMPTION ANALYSIS It connects seven switches, sensors or consumption detectors (or four of them, three of which with a double function) with an opto-isolated output, in compliance with the EN62053-21 standards. The module can connect to up to four detectors. A single module can therefore analyse the consumptions of electricity, water, gas, etc. To view the instant or definitive consumption data, it is necessary to connect an Urmet Modio or iModio monitor or an IPerHome server to the system, thus allowing the PC, tablet, smartphone and smart TV connection. > Dimensions in inches 1.4 x 2.2 x 3.5 (W x H x D) rated CUs: 3 > DIN modules: 2
1071/7		

RELAY OUTPUT MODULES

		SINGLE-OUTPUT MODULE 16A A compact relay module that can be installed in three or four-module boxes, or in 2.3-inches ones, as well as in junction boxes. It features two supplementary local inputs to control the relay in step mode. > Dimensions in inches 2.8 x 2.3 x 0.9 (W x H x D) rated CUs: 2.5
1071/11		
		DOUBLE-OUTPUT MODULE 16A The two-relay module can be installed in four-module flush-mounting boxes or in junction boxes. It can be used to manage two devices or to interrupt phase and neutral towards a single appliance. It features four local inputs to control the two relay in step mode. > Dimensions in inches 3.9 x 2.5 x 1.1 (W x H x D) rated CUs: 4
1071/12		
		GENERIC FOUR-OUTPUT MODULE It is provided with four potential free relay contacts. It allows to control 230 Vac and low-voltage loads. In the first case, it can disconnect phase and neutral at the same time. > Dimensions in inches 2.8 x 2.2 x 3.5 (W x H x D) rated CUs: 6 > DIN modules: 4
1071/13		
		FOUR OUTPUTS DISCONNECTOR MODULE It is similar to the 1071/13, but it was designed to distribute the (solid) neutral wire on four outputs and the phase towards four different loads through four 16A disconnecting relays. Input neutral and phase come from a single magnetothermic switch. > Dimensions in inches 2.8 x 2.2 x 3.5 (W x H x D) rated CUs: 6 > DIN modules: 4
1071/14		

iPerHome IPERHOME
MODULES

LIGHT DIMMING AND SHUTTERS CONTROL

1071/15		<p>DIMMER CONTROL MODULE 0/1-10V This module is provided with four analogue 0/1-10V outputs, and it allows to control up to four dimmers of the most common modules, fitting different types of lights (fluorescent, incandescent, energy-saving, LED-types, etc.).</p> <ul style="list-style-type: none"> > Dimensions in inches 1.4 x 2.2 x 3.5 (W x H x D) rated CUs: 2.5 > DIN modules: 2
1071/42		<p>TWO-MOTOR DIN MODULE It can be installed on a DIN bar to manage two different motors. It receives phase and neutral from a magnetothermic switch, and manages every motor through three cables, controlling their interlocking.</p> <ul style="list-style-type: none"> > Dimensions in inches 2.8 x 2.2 x 3.5 (W x H x D) rated CUs: 3.5 > DIN modules: 4
1071/43		<p>SINGLE MOTOR MODULE The module can be installed in the box instead of the DIN bar, and controls only one motor. It is equipped with two local control inputs that manage the motor in two directions and command its locking.</p> <ul style="list-style-type: none"> > Dimensions in inches 2.8 x 2.3 x 0.9 (W x H x D) rated CUs: 2.5
1071/44		<p>TWO-MOTOR MODULE It is similar to module 1071/42, but it can be installed in the motor box instead of the DIN bar. It is equipped with two inputs for each motor, to obtain the two-direction local management. It controls the locking.</p> <ul style="list-style-type: none"> > Dimensions in inches 3.9 x 2.5 x 1.1 (W x H x D) rated CUs: 4

1071/15

1071/42

1071/43

THERMOREGULATION

1071/31		<p>TEMPERATURE REGULATOR It is similar to a programmable thermostat, it can be installed on three-module boxes and it is compatible with Simon Urmet's Nea wiring system, and with many of the most common wiring systems available on the market through specific adaptors. It allows to programme the time of activation of the conditioning system. The module connects through the bus to the temperature sensors, which in turn control the activation of the output modules linked to boiler, solenoid valves, pumps and air conditioners.</p> <ul style="list-style-type: none"> > Dimensions in inches 2.5 x 1.7 x 1.9 (W x H x D) rated CUs: 1
1071/32		<p>TEMPERATURE SENSOR Compatible with Simon Urmet's Nea series, and with the most common ones. It measures the environment temperature in real time, and activates or deactivates heating and conditioning systems according to the set parameters. It sets a reference temperature for every hour and day of the week level through the regulator, choosing among:</p> <ul style="list-style-type: none"> > Night time > Day time > Comfort <p>It is possible to activate manually a specific function mode. If these devices are installed, programming and functioning will be managed through the 1071/31 regulator, or the graphic interface provided by the IPerHome server.</p> <ul style="list-style-type: none"> > Dimensions in inches 0.8 x 1.5 x 1.9 (W x H x D) rated CUs: 0.5

1071/44

1071/31

1071/32

iPerHome | IPERHOME MODULES

1071/20

INTERFACE AND POWER SUPPLY

POWER SUPPLIER

- 1071/20  Accepts an input voltage of 100-240 Vac, and is installed on the DIN bar. It supplies 100 (unit loads) CUs. Each module absorbs a given amount of CUs. If the total absorption of the modules exceeds the maximum capability of the power supply, it is possible to install auxiliary power units.
- > Dimensions (mm) 78 x 56 x 93 (W x H x D)
 - > DIN modules: 4.5
-

1071/55

INTERFACE AND POWER SUPPLY

MODULO INTERFACE

- 1071/55  It connects to the Urmet Modulo monitor to integrate Urmet's digital video-doorphones to IPerHome. The installation of this device will let you use the video door phone monitor to:
- > Activate the scenarios through a simple and intuitive interface
 - > Manage the alarm signals sent to the Modulo monitor and, if any, to the telephone exchange
 - > View the instant energetic consumptions of the energy meters connected to the 1071/7 modules
 - > Dimensions (mm) 40 x 30 x 14 (W x H x D) rated CUs: 0.5
-

1071/56

BUS INTERFACE CONFIGURATION TOOL

- 1071/56  Is installed in the electric panel, and is equipped with a USB port to connect to the PC. By installing the IPerSet software on the PC, it will be possible to set up the entire system. It works as an interface between the bus and the server (if any)
- > Dimensions (mm) 36 x 58 x 90 (W x H x D) rated CUs: 1
 - > DIN modules: 2
-

1071/62

INTRUSION ALARM INTERFACE

- 1071/62  Through an RS485 interface, it lets you connect the Urmet 1067 and Elcron MP504 and MP508 system to the server (if installed). In this way, intrusion alarm and IPerHome will be perfectly integrated, and it will be possible to control the state of the systems through an iModo monitor or a local or remote terminal.
- > Dimensions (mm) 109 x 91 x 30 (W x H x D)
-

iPerHome | IPerHOME MODULES

SERVER AND MONITOR

1071/3		<p>BASIC SERVER The first server to introduce you to the IPerHome advanced functions. It can be installed on a DIN bar as well. It can be linked to IPerBus through the module 1071/56, and to the intrusion alarm control unit through the 1071/62 module. It allows to:</p> <ul style="list-style-type: none"> > Connect the system to the Internet, thus enabling the remote control > Manage the video surveillance camera in snapshot mode > Manage the music libraries uploaded on the NAS > Manage 100 points, 3 maps, 8 scenarios > Connect up to 2 users at the same time > Dimensions in inches 2.5 x 4.4 x 1.3 (W x H x D) > DIN modules: 4 		1071/3
1071/4A		<p>SERVER PRO It is a fanless PC with Atom processor and Windows operative system. It connects to the IPerBus through the 1071/56 module, and to the intrusion alarm control unit through the 1071/62 one. The server can be installed also on the DIN bar. It offers all the Server Basic advantages, plus:</p> <ul style="list-style-type: none"> > Management of the graphic maps > Management of more scenarios and controls at the same time > Management of two more bus besides IPerBus > Data storage hard disk > Management of 600 points, 8 maps, 48 scenarios > Up to 4 users connected at the same time > Bus managed: IPerBus, KNX, Dali, Modbus TCP, Modbus RTU, IRTrans, Lutron > Program the scripts and ad hoc macros developed by Urmet technicians > Perform the programming through scripting > Dimensions in inches 6.6 x 1.5 x 4.3 (W x H x D) > DIN modules: 5 		1071/4A
1717/12H		<p>MODO 2VOICE A 7" screen, touch-screen interface is the perfect accessory to complete Urmet's digital video-doorphones 2Voice and IPerVoice. If associated to IPerHome, it allows a quick activation of the scenarios and the displaying of the technological alarms.</p> <ul style="list-style-type: none"> > Dimensions in inches 8.6 x 5.0 x 1.3 (W x H x D) 		1717/12H
1717/31		<p>MAX MONITOR</p> <ul style="list-style-type: none"> > 7" touch-screen display > Home automation and video door phone control terminal on IP technology > Wall or flush-mounting > WI FI and Yokis integrated transmitter, 2MPX camera > White frame 		1717/31

INTEGRATION
BUILDING AUTOMATION

INTEGRATION PLATFORM
FOR BUILDING AUTOMATION

IPerView | IPERVIEW: INTEGRATION PLATFORM FOR BUILDING AUTOMATION

REAL-TIME INTEGRATED TECHNOLOGICAL AND SECURITY SYSTEM CONTROL

IPerView integrates different types of systems that operate together and interact, centralising remote systems control.

Since it allows the interaction among remote systems, IPerView offers unlimited operational possibilities, and displays information in real time.

The system must be installed after the plants, so it allows a customised plant management according to the needs of the single building.

Based on client-server architecture, IPerView communicates with the control units and the peripheral devices:

- > A central server for integration
- > Peripheral interface units for subsystems
- > One or more monitoring stations

IPerView offers more extended use functionalities with the systems: is also compatible with third-party devices.

A CUSTOMISABLE SYSTEM

IPerView software can be connected to several devices, ensuring interoperability among different systems; then the supervisor can check various scenarios, allowing lower operating costs, uniform procedures and flexibility. IPerView has a map-based graphic interface where maps can be hierarchically arranged according

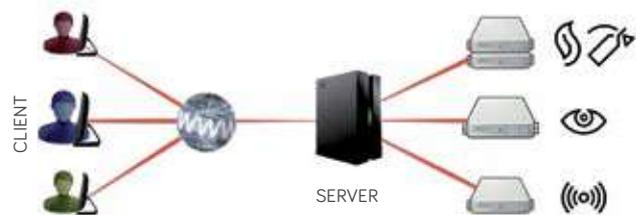

to your needs. Moreover, the system allows to view in real time the connected input and output devices, indicating:

- > Location
- > Type
- > Status
- > Operating logics

The system is equipped with a drag and drop interface, that allows to match devices

A single modular system to manage:

- Intrusion alarm
- Fire alarm
- Gas detection
- CCTV
- Video door phone
- Personal emergency response systems and SOS panic alarm
- On/off devices

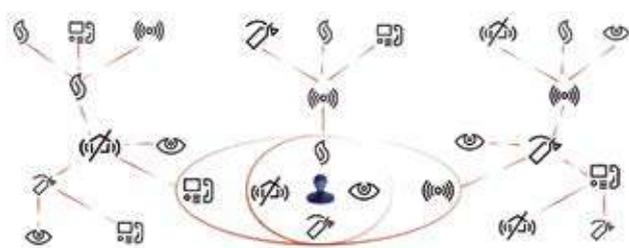

and relevant sensors by simply dragging them with your mouse. In case of alarm, IPerView reports the events, so it is possible to promptly manage them through checklists and action plans. The system not only allows to focus on particular events, but also allows technical supervision and maintenance of systems.

AHD 1080N VIDEO SURVEILLANCE KIT: TOTAL CONTROL

EVERYTHING YOU NEED
TO CREATE A BASE SYSTEM

Two kits suitable for all applications: digital 4-channel video recorder and compact camera with 3,6 mm lens, or digital 8-channel video recorder and compact camera with 2,8 - 12 mm lens.

1097/800 CCTV KIT WITH AHD 4CH HVR

- > 1x Ref. 1093/504N - HVR 4Ch 1080N P2P
- > 2x Ref. 1092/001E - D&n AHD compact camera 1080p - 3,6 mm lens
- > 2x Ref. 1092/800 - Power supply 230 Vca 12 Vcc - 500 mA
- > 2x Simplified privacy form model

1097/801 CCTV KIT WITH AHD 8CH HVR

- > 1x Ref. 1093/508N - HVR 8Ch 1080N P2P
- > 2x Ref. 1096/201 - AHD 1080P AF compact camera - 2,8-12 mm built in lens
- > 2x Ref. 1092/801 - Power supply 230 Vca 12 Vcc - 1.200 mA
- > 2x Simplified privacy form model

PRE-SALES AND AFTER-SALES SERVICES

Sales network

Urmet accompanies its customers in all their working phases, from the choice of the best solution to assistance in guaranteeing a complete and accurate service. The sales network is diffused all over the national territory. Urmet customer service responds in real time to doubts or installation needs and the Service Centres are specialised so as to assure competent and punctual support.

Web

WWW.URMET.COM

The Urmet website has been thought as a valid work support which helps the designer, the wholesaler and the installer in finding all technical data useful to their work.

Moreover, a wide space for images and the presentation of the new products permits customers and architects to always be updated on the evolution of the product range.

Software

An automatic quoting, system, with a simple interface allows to visualise and choose the components of the installation and to obtain the quote in just one click. A practical, useful and always updated tool.

This Urmet software has been thought for those who need to design door phone or video door phone systems: all you need is to specify the required system and the number of users and Doc Proget will supply all the specifications with the complete solutions of the required components.

WWW.CLOUD.URMET.COM

The future of video surveillance is on the cloud! Urmet Cloud allows to control your house, shop and office easily and quickly: cameras connect to the Wi-Fi network available at the installation site with no need of router configuration; through Urmet Cloud portal and app, available for **Apple® iOS™** and **Google® Android™**, it is possible to register your cameras and check them through a single user account from smartphone, tablet and PC.

And with the new hNVR it is possible to increase the recording capacity of the cameras.

WWW.MYURMETHOME.COM

My Urmet Home allows to use your smartphone or tablet to have full control on your theft alarm.

You can display the status of your system and activate or deactivate it totally or partially. And, in addition to intrusion alarm, video surveillance as well!

With My Urmet Home you can access the images of surveillance cameras connected to your Urmet control unit 1067.

PRE-SALES AND AFTER-SALES SERVICES

URMET:
OUR SYSTEM IS
CENTRED AROUND
OUR CUSTOMERS

Technical handbooks

Technical data, equipment and installation systems: a collection of all data indispensable for work. An effective support for study and widening possibilities.

Newsletter

Product novelties, events, promotions and courses: the voice from the Urmet world for a continuous updating on the Group's offers. To receive the newsletter, please register to www.urmet.com.

Courses

Meetings to present novelties, courses on new systems and products - opportunities to develop direct contacts with clients and furnish answers to their needs.

WWW.IPERHOME.COM

IPerHome is the home automation system where all technological know-how of Urmet Group merges, integrating video door phone, video surveillance, intrusion alarm, gas and smoke detector system, automation, energy saving system, audio system and Internet connectivity.

It is possible to register your server and access the control interface of your system through IPerHome portal.

WWW.YOKIS.COM

The range of Yokis digital modules allows to design multi-controls and centralisations for lights and shutters with no two-way switch, inverter or home automation system, using only electric cable and wall-mounted pushbuttons.

Yokis modules communicate via radio or driver wire built with a standard cable. Programming is achieved with standard buttons, with the possibility to easily create customised scenarios and settings at low cost for end customers.

APP

With Call2U, CallMe, MyZENO and My1067+ it is possible to manage Urmet video door phone and intrusion alarm systems in a simple and user-friendly way directly from a smartphone or tablet. Remotely-operated functions allow the user to customise the system according to his/her needs, preparing alarms and activating scenarios. Urmet Apps can be downloaded for free from Google Play (for Android) and Apple Store (for iOS).
